

# CD PLAYER for Word 6.0 for Windows

©1995 By Andrew M. Freeman <ASP>

Press the Install Button Below to Install:

If Install Fails see the toolbar setup below for further information on manual installation.

You MUST either assign each macro to the menu, or INSTALL ALL MACROS, or CD PLAYER will NOT work.

A Toolbar is included, and is needed for use:  
DO NOT RENAME THE TOOLBAR

**Copying the toolbar** can be done using Tools, Macro, Organizer:

First, click on the Toolbars tab. In the left box, make sure that this template, CD(.doc) is showing, and in the right, make sure that the template, NORMAL(.dot), is showing. In the CD.DOC box, highlight the CD Player AMF toolbar. Then choose copy. **Macros can also be copied in the same manner (Just click on the Macros tab).** Finally, click on Close at the bottom. Now start a new document, and if the toolbar is not in View, choose View, Toolbars, and put an X in the check box in the toolbar labeled CD Player AMF. For more help, consult your manual.

THE TOOLBAR CAN ALSO BE SHOWN WHILE RUNNING THE CDPlayer Macro- see instructions below:

Running CD Player:

Either run the macro from the selection under Tools, Macro, and click on the WWCDPlayer Macro, or click the CD shaped Toolbar Button.

CD Player will display the current track, the current time in the track, the total playing time, and the title and author of the CD.

This Program also supports CD Players which eject.

Depending on your CD-ROM drive (most will), you will be able to change the CDs without stopping the CD Player. AN error will not be caused. So, if you take out the current CD, and put in a new CD, this program will recognize it. You just have to hit PLAY.

**\*\*Note:** On some computers, you may have to wait a few seconds for a control to become responsive to clicking. PLEASE WAIT.

Here is a description of what each button does:

Less: On some computers, continually updating the TIME may divert attention from the controls, so this button stops the time function giving more attention to the controls.

More: This reverses the Less button, and displays the current time.

TB: Hides and displays the toolbar for the CD Player.

PLAY |>: Starts the CD Player. (On the toolbar it resumes the CD after a pause.

|<<: Plays the CD from the previous track.

<<: Scans the CD back 15 seconds.

>>: Scans the CD forward 15 seconds.

>>|: Plays the CD from the next track.

| |: Pauses the CD.

:::- Resumes the CD after a Pause.

[S]- Stops the CD.

E : Ejects the CD on drives that support Eject.

Random: Selects a Random Track and plays the CD from there.

Add: Adds the CD's Title and Author to the Database. When the CD is put in, CD Player will automatically recognize it. You can also use this to CHANGE the title and or author, if you so desire.

Close: Closes the Dialog Box, and allows the CD to continue to play if the user so chooses.

---

Note: The play button on the toolbar will not alert you if your CD Player is not ready. Only the CD Player Dialog will tell you that. Depending on your system, you may have to run the CDPlayer macro a couple of times after a "Not Ready" message. This is due to system and CD-ROM speeds.

**The Registration:**

Registration is important to the ShareWare market. Your investment of **\$15** will not only **HELP ME THROUGH COLLEGE**, but will encourage me to produce bigger and better programs that are a benefit to all. So please, if you use this macro/program, CD Player, register **\$15.00** to:
