

# *DocuPower Pro™ 3.x*

## *Document Management System for Microsoft® Word for Windows™ 6.0x*

**Certified “Microsoft Office Compatible Software”**

### *Supplemental Functions Installer*

**– Installs File Find, Text Search &  
Windows System Status Utilities –**

**Double Click Button To**

#### *Before You Begin*

This file is more than a simple Word for Windows document. Double clicking the **Install** button above will automatically install the supplemental *DocuPower Pro™* function libraries. *DocuPower Pro™* must already be installed **before** you install these function libraries. These libraries will then provide you with the following additional features: File Find, Text Search, and Windows System Status.

#### *Extra Features: Free!*

After installation, your copy of *DocuPower Pro™* will be enhanced with the integration of the features described below:

##### *File Find and Text Search*

**File Find** and **Text Search** will allow you to reclaim your "missing files". A successful search will compile a list of files that match your specified criteria. You may then choose to either open these files in Word, or add them directly to any *DocuPower Pro™* folder.

##### *Windows System Status*

The **Windows System Status** utility reports important information about your system — total memory, system resources, remaining hard drive space, drivers, etc. It also provides you with convenient push-button access to edit your WIN.INI, SYSTEM.INI, AUTOEXEC.BAT, and CONFIG.SYS files.

For more information about how to use these utilities, please see MANUAL.DOC in your *DocuPower Pro™* program package.

## *Getting Current Versions*

If you don't yet have a copy of *DocuPower Pro*<sup>™</sup>, you'll find the latest version on our own free customer support BBS (718-375-6261), as well as CompuServe, AOL, the Internet, and many popular BBS's.

*Get the **power** with **DocuPower Pro**<sup>™</sup>  
“And never misplace a file again!”*
