

**Please ensure that an old copy of T&C is NOT running already on your machine, before you run INSTALL.EXE - As a precaution, it is always recommended that you perform a backup of your data prior to installing an update.**

T&C updates are designed to be installed in the same subdirectory as the old version. Data Files will be maintained. If conversion is required, it will be automatic upon the initial startup. Previous security codes from v4.x will be automatically maintained. If you have registered a v4.x product, this is a no charge update.

If you are running on **Windows NT or Windows 95** you should install T&C to a new subdirectory and restore your datafiles.

We have **new Internet addresses**.

- \* send MAIL to either **support@isbister.com** or **sales@isbister.com**
- \* Our HOME PAGE is **http://www.isbister.com/isbister** (you can get updates here)
- \* FTP **ftp.isbister.com** - files are located in cd/pub/isbister

**Thank you all very much for your continued support!**

#### **Changes in v4.06**

- \*Printing Enhancements include ...
  - \* T&C can now utilize the available paper. If there is room on a page for a additional virtual pages it will print them on the same page.
  - \* Ability to print out a range of calendars. eg. 3 months of calendars
  - \* Ability to print each Letter of the alphabet on a separate page
  - \* Ability to print a letter range eg. F through M
- \*Many more repeat options for Todo's and Appointments.
- \* Julian Dates are now displayed on the main screen by holding down the mouse on a date
- \*More secure passwords. The passwords are now stored in binary format in the database header. Your passwords will be deleted and you will need to rekey them.
- \*Multi-Disk Backups/Restores are now supported
- \*Report Writer Enhancements include ...
  - \* Category Sorting
  - \* Compare Field now does not need to one of the reported fields
  - \* Ability to Save the Report as a TEXT file, including full NOTES.
  - \* ALT C will remove a Column both on the screen and on printout.
- \*Multiselect in the ToDo List, Appointments List, Phone List on main screen. This allows you to select multiple items for deleting, marking done, moving.
- \*Importing now uses a user specified file, not just IMPORT.TXT
- \*Dragging a Todo to the appointments will now drag with it notes, priority and description.
- \*Much More little nitty things.....

#### **Changes in v4.05**

- \*We now have very tight integration with MS Word, AmiPro, and WordPerfect for Windows
- \*Phonebook now supports ATTACHED FILES to contacts. You can attach spreadsheets, documents,
- \*New option under preferences setup to handle EUROPE, this will have postal code print on the envelope BEFORE the city.

#### **Changes in v4.04b**

- \*Optional Modem initialization string
- \*Allows users with very large phonebooks to define a set of phonebook categories for startup
- \*Due to popular demand the 'Spinning Top' has returned to the T&C icon
- \*The 'bug' that prevented T&C from working with Norton Antivirus has been corrected.
- \*Export from the search screen is now based on 'selected highlighted records'
- \*The YearView Screen now supports tabs to jump to previous and next years.

### **Changes in v4.04a**

- \*Maintenance Update that corrects all reported/confirmed bugs in v4.04
- \*Adds small monthly calendars to the top of the Todo List and Appointments Printouts
- \*Program no longer requires any iii\*.DLL files. These may now be deleted from your chaos subdirectory if desired.
