### 1994 Canadian Individual Income Tax Return (T1 General)

The spreadsheet was developed from the 1993 Windows version which was a major conversion from the 1991 & 1992 DOS versions. This 1994 version includes schedules 1, 3, 4, 5, 7 & 8 and forms T657A, T936, T2017 & T664 for the election package. The spreadsheet permits what-if analysis when completing tax returns. It also provides a convenient way of storing past year's returns on disk.

The spreadsheet consists of all sections of the T1 General return along with several schedules, capital gains forms and includes Ontario Tax Credits. The introduction page provides an index to the various sections of the form, access each form by clicking on the appropriate page tab. You are expected to enter a value when you see a line number with an entry box as is typical in the Revenue Canada forms. Example:  (253)  
 Note: In unusual cases you may need to over ride a protected (formula/reference) cells to customize your entry.

The window is split to allow continual display of the "Bottom Line" thus allowing one to change values in the return and immediately see the net effect on the amount due or refunded.

Note: See CAUTION below.
