

Keepout v 3.0

A new and improved password protection facility for Windows. Keepout KEEPS unauthorized users OUT of your Windows environment. Keepout is a dialog box that asks for a password. No password, No access to Windows. Keepout is run at startup and sounds a wave file when the password is entered. Windows is unavailable until the password is entered. For best results move Keepout.exe to your Startup group. Keepout Disables Ctrl+Alt+Del.

THE DEFAULT PASSWORD FOR KEEPOUT AND KSETUP IS INTRUDER. IF YOU HAVE PREVIOUSLY SET A PASSWORD WITH KEEPOUT 2.5, YOUR OLD PASSWORD WILL STILL BE IN EFFECT WHEN YOU INSTALL KEEPOUT 3.0.

RUN KSETUP TO CONFIGURE KEEPOUT TO SET YOUR NEW PASSOWRD.

ON-LINE HELP IS AVAILABLE FROM WITHIN KSETUP

Keepout requires a sound card or computer speaker for full operation, but for basic functionality sound is not necessary.

The password, caption and program sound are modified from KSetup, the Keepout configuration utility.
