

Fiddler's Green - Kiss U Miss U

Alone with you, there comes a time
That makes the change
A change deep down inside of me
Once I was blind
Now every sense crawls back to life
And like a new-born I can see

It takes no life to catch the bliss of happiness
We long for moments that will last
There comes a time
When I'll be standing by your side
A long day's journey into night

Those seconds are the rags of time
But they will make you see
Those moments never pass you by
I store them, I hold them in me

Oh, I kiss you, miss you anyway
Oh, I kiss you, miss you every day

There comes a time
When I will find that precious love
Comes a time when time will end
There comes a time
When we will dance the night away
A time when we will not pretend
