Advanced Viewing Methods

The **right mouse-button** gives access to more advanced ways of viewing an album. Pressing the right mouse-button will display a menu with the following options :

Flip To

This allows you to flip to various parts of the album quickly. Another menu will be displayed with the following sub-options : (Note these options are available from the main menu by clicking on the **Flip To** menu.)

Overview : Go to the Overview page.

Content : Go to the Contents page.

First Page : Go to the first image page.

Index : Go to the index page.

Name : Go to a specific page by clicking on the image name from the list displayed. It is also possible to type parts of the name, in the **File to name** box, and FlipAlbum CD 1.0 will display any matches. To go to the page either double click on the image name in the list (note that the Name menu will not disappear) or select the image name and click on **Flip** or **OK**.

Page : Go to a specific page in the album.

Annotation : Go to a specific page based on the annotation on the page. It is possible to type parts of an annotation, in the **Annotation to find** box, and FlipAlbum CD 1.0 will display any matches. To jump to the page either double click on the annotation in the list (note that the menu will not disappear) or select the annotation name and click on **Flip** or **OK**. As annotations can be fairly long only the first few words of each annotation will be displayed in the list.

Auto

Have FlipAlbum CD 1.0 automatically flip through the pages for you.

Preview

Display a preview of an image in the album. Click on **Preview** and then select **Left** or **Right** page to preview of the image on the left or right hand page of the album. The images will be displayed full screen. To view information about an image press the right mouse button, while viewing the image in preview, and select **Information**. To return to the album press the right mouse button and select **Exit** or press any key.

Information

Displays information about an image. This option provides information about the image currently selected.

The meaning of each entry is explained below :

<i>File Name :</i>	Name of the selected image file.
<i>Image Format :</i>	Format of the image.
<i>Width :</i>	Image width in pixels.
<i>Height :</i>	Image height in pixels.
<i>Bits per pixel :</i>	The number of bits used for each pixel of the image.
<i>Size On Disk :</i>	The amount of space occupied by the image on disk.
<i>Size in Memory :</i>	Amount of main memory used by image.
<i>Compression :</i>	Compression method used, if any.
<i>File Date :</i>	Date file was last modified.

Window Frame

When this option is not selected (i.e. no check mark next to it) the usual window frame and menus will not be displayed when viewing the album. To have these displayed check on **Window Frame** option.

Set Flipping Speed

This option set the page flipping speed of the album. Slide the slider bar to the desired speed between 5% and 75% and use the **Backward** and **Forward** buttons to test the new speed setting. When you are satisfied with the speed setting, click **OK**.

Using FlipAlbum CD 1.0

The most important feature provided by *FlipAlbum CD 1.0* when browsing through images in a folder-book is the flipping paradigm reciprocating the actual page flips of any book. This is simply achieved by clicking on the pages using the mouse. Just like in an actual book, the pages can be accessed sequentially or a page jump can be made to any selected page. This can be achieved by using the mouse and clicking on the page edge thickness representation.

It is also possible to use the left and right arrow keys to flip through album pages. In addition the user can also use the FlipTo menu or other means to jump to a desired page.

Overview Page and Thumbnails :

The *Overview* page, has a number of small images on it called thumbnails. These provide an overview of the images in the album. Clicking on the name of the thumbnail, displayed above the thumbnail image, causes the album to flip to the corresponding page.

Contents Page :

The *Contents Page* displays a list of the album images and the page numbers on which they appear. Clicking on an entry in the *Contents Page* will cause the album to flip to the corresponding page.

Index Page :

The *Index Page* is located at the back of the album and contains an alphabetical list of the images in the album, along with the page numbers in which they appear. Clicking on an index entry will cause the album to flip to the corresponding page.

Bookmarks :

Bookmarks appear in the album as tags on the edges of the album pages. Simply click on the tags to flip the album to the bookmarked page.
