

Chef V 3.0 a

This is my second try at Chef. In the first one I used database-drive records. The Application was large and what I hate the most very slow.

This version of Chef is fast even on a 286 it's acceptable. It also gives us an unlimited amount of Cookbooks. I like that I am a Chef and working in restaurants it allows me to categorize recipes in several books.

One of my pet peeves is recipes written in different Type SOME Capitalized others not, MAKES things look messy. The recipe form has all capitalization restricted, everything will look the same.

There is a small help form on the bottom of the Chef screen that tells you what the icons and text boxes are for, just move the mouse.

Included files are:

Chef3a.zip
Threed.Vbx
Readme.wri

The needed file Vbrun300.dll is in Windows Shareware Forum and should be placed in the Windows\System directory along with the Threed.Vbx file. If you already have either of these files make sure you keep the latest version and delete the other.

Chef can be installed in any directory.

To register:

- on CompuServe 'GO SWREG'
- Id number # 2164
- \$ 8.00 will be deducted off your CompuServe Bill
- the registration code will be in your CIS Mail Box within 36 hours
