## Colophon

This document contains an episode list for Star Trek: The Next Generation, presented in stardate order. It is meant to be compact and convenient, for the coffee table, near the remote control. I know you will enjoy it.

I'd like to thank Bill Lambdin, Ian Colomby, Jim Shaun Lyon, Milan Rezac, Carl Chin, and Bradley Grigor for news and proper character, planet, weird item spellings; James Carcary, Darren Sager, James Thomas, and Matthew Barnes for proof-reading. A special thanks to Darren for the cover graphic and correcting several stardates.

The descriptions are almost straight copies of television guide listings as found in the Globe & Mail's Broadcast Week, Toronto Star's Starweek, and Telemedia's TV GUIDE. I am not claiming copyright.

The second digit in the stardate indicates the season. For example, the third season episode The Offspring has the date 43657.0. The '4' purportedly means 24th century.

An asterisk (\*) denotes a fictitious or estimated stardate. Either the narration did not include a date, it is unknown, or the source is outside the show. An invented date positions the episode in Gene Roddenberry's future history time-line.

A dagger (†) marks an episode not yet aired. Often, I have no plot description nor do I know the stardate.

The name of this 14-page file is TNGEPLST.xxx. A WordPerfect 5.1 (release 07/09/92) column document, the "xxx" extension indicates the organization of the pages: DUP for duplex printing (on a HP Laserjet IIID for example); NOD for non-duplex printing (most printers). I copied the entries from my indexed database video tape catalog to generate this guide.

I generated this revision at hours DST on .

A guide for Star Trek: Deep Space Nine is available too!
