WinQuotes is a set of four humorous quotation display Windows programs. Each program displays a different type of quote: Fortune Cookie displays silly quips, Daily Quote displays interesting and famous sayings, Funny Bone displays jokes, and Quayle Quotes displays the infamous words of former VP Dan Quayle.

To install, unzip the WINQUOTE.ZIP file (using PKUNZIP) into a new directory (ex.: C:\WINAPPS) or the Windows directory. Copy or move VBRUN100.DLL to your Windows directory.

To run a WinQuotes application you can either run the executable (ex.: COOKIE.EXE) from the File Manager, or create a "WinQuotes Applications" group in Program Manager and a desktop item for each program. Be sure to set the **working directory** to where you installed or you may get a "File Not Found" error when you try to run the application.

Fortune Cookie, Daily Quote, Quayle Quotes, and Funny Bone are FreeWare and can be used and distributed but not changed or sold. The WinQuotes datafiles can be customized to include your own quotes and sayings.
