- - -Win OnTop- - -
Version 4.0
1990-1994 G. L. Liadis Software, Inc.
All Rights Reserved

Requirements:

1). Windows Version 3.1 or higher

2). The file VBRUN300.DLL, installed in your Windows\System directory (all Visual Basic programs require this, you may already have it and if you don't you will probably want / need it sooner or later).

Installation:

1). Make a new directory named "WONTOP" and copy WOTOP4.EXE (and optionally WONTOP.WRI to it) You may copy these files to your Windows directory if you wish.

2). Copy threed.vbx to the Windows\System directory. If there already is one there check the file dates and use which ever one is the most recent.

3). Create a new program item (see your Windows documentation) for Always On Top.

4). If you want to start it each time you use Windows include it in the Startup group or the Run= line in the Win.ini file. Eg... "Run=C:\Wontop\WOTOP4.exe". Just add this line manually behind whatever is already there leaving a space between the last one or use the Program Manager to have it start it for you (again see your Windows documentation for details).

The files that are included in the package are
as follows :

WOTOP4.EXE   Win OnTop executable file
threed.vbx
Wontop.wri.............This file.

Operation:

Once the program is loaded and on the screen   position the mouse on the title bar or border of the application you wish to keep always on top and press CTRL-T.

NO warranties are offered either express nor implied.
