**Register this program and any of our other program on Compuserve  
GO SWREG select KEYWORDS then enter LIADIS.**

Win SetTime is a utility that allows you to dial automatically and get the current universal time from the National Institute of Standards and Technology atomic clock, in Boulder. CO convert it to your local time zone and update your system clock with it.

**NOTE: If all lines are in use at any time, the oldest call will be terminated,  
you will hear a high tone and the phone line will drop.**

If you have any questions or comments about the atomic clock write to:

**NIST-ACTS  
Time and Frequency Division  
Mail Stop 524  
325 Broadway  
Boulder, CO 80303**

**If you have any problems with the Win SetTime itself let us know.**

## **Instalation:**

Copy Win SetTime to a directory of your choice and create a new program group.

The **WinTime.ini** file holds the differences between GMT and your local time zone. I

## **Change from Tone to Pulse Dialing:**

If you want to change from tone to pulse change the dial prefix to = ATDP

**This version supports all times zones world wide.**

**Format of data sent to NIST Clock.**

Each second, a line with the following form is sent:

JJJJJ YY-MM-DD HH:MM:SS TT L UT1 msADV UTC(NIST) \*

JJJJJ = Julian date since 1/1/-4713 (minus 2.4 million)

YY-MM-DD = Current date (GMT)

HH:MM:SS = Current time (GMT, 24-hour clock)

TT: 00 = standard time

01-49 = daylight time, TT days until standard time

50 = daylight time

51-99 = standard time, TT days until daylight time

L: 1 = Leap second added at midnight tonight; otherwise 0

UT1 = Correction factor for older time measurements

msADV = Milliseconds time code is sent in advance of actual time (allowing  
for transmission delays)

\* = Time mark

#### Files:

<b>WSTime.exe</b>	<b>Executable file</b>
<b>WSTime.wri</b>	<b>This file</b>
<b>MSCOMM.VBX</b>	<b>Place this file in your Window\System Directory</b>
<b>THREED.VBX</b>	<b>Place this file in your Window\System Directory</b>

If you use an older version of Win SetTime Delete the WINTIME.INI file located in your Windows\System directory.

You also need **Visual Basic Runtime 3.00** (VBRUN300.DLL) installed in your Windows System directory.
