

## 65 Powerful search criteria.

You can quickly find your dream home by using 65 powerful search criteria. To change areas, simply click on a folder tab. As you choose your search criteria, a status counter instantly changes to tell you how many plans satisfy your search criteria.

For some search criteria, you can choose 'wants' or 'Musts'. To make an item a 'Must', slide the button all the way to the right. To make an item a 'want', set the priority of your want (1 = low priority, 9 = high priority). These priorities will be used to sort the homes that are found. Your favorite home will likely be one of the first homes you are shown.

Plans from the same designer may have a similar style. You may find a home you'll love simply by reviewing other plans from your favorite designer.

To determine which designer created a plan, you can read specifications window (in the view screen).

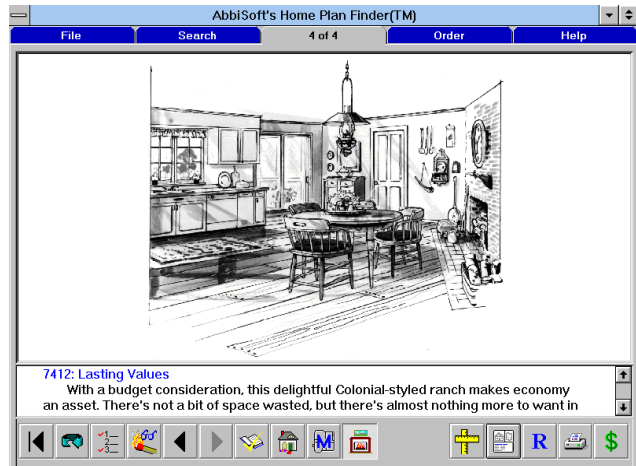

You can reverse pictures to see how a home will look if you build it in a mirror image.

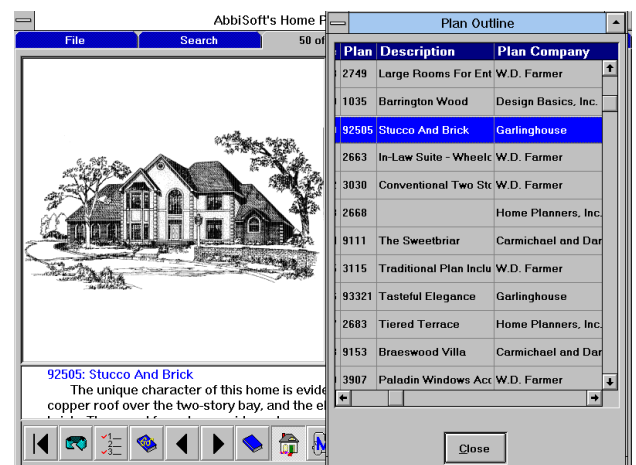

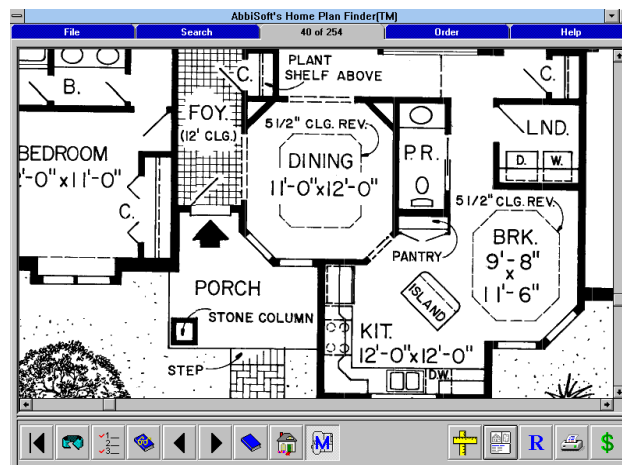

You can view multiple pictures.

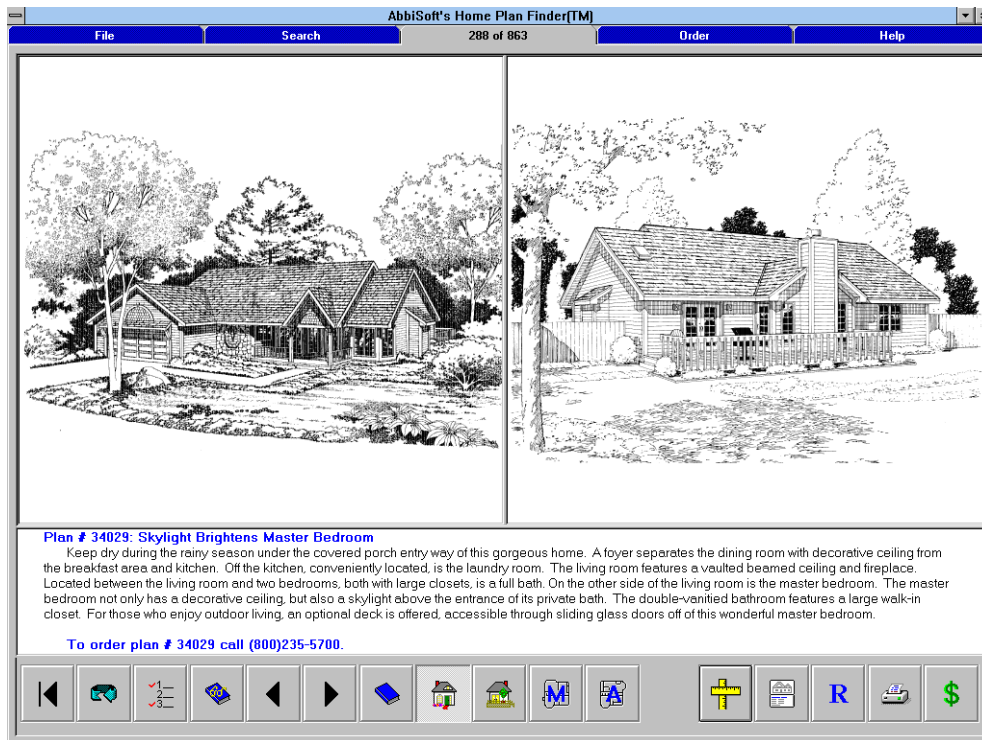

Some homes have interior pictures.

You can magnify pictures. Also, a table of contents helps you quickly go to a specific plan.

This CD-ROM has over 240,000 words describing the thousands of homes.

You can also read feature summaries and building specifications
