cm In

m--FT

km--MI

cm²--IN²

cm³--IN³

m³--FT³

L--US GAL

g--OZ

mL--IMP FL OZ

L -- IMP GAL

C -- F

m² -- FT²

mL -- US FL OZ

kg -- LB

Centimeters to Inches

This will convert centimeters to inches & reverse.

Enter the number you wish converted
ex 12 inches
and click on the function button labeled

To Metric

Click on cm in.
This will complete the conversion.

To convert from Centimeters to Inches: simply click on the button marked
From Metric

Meters to Feet

This will convert meters to feet & reverse.

Enter the number you wish converted
ex 12 Feet
and click on the function button labeled

To Metric

Click on m ft.
This will complete the conversion.

To convert from Meters to feet: simply click on the button marked
From Metric

Kilometers To Miles

This will convert Kilometers to Miles & Reverse.

Enter the number you wish converted
ex 12 Miles
and click on the function button labeled

To Metric

Click on km -- mi
This will complete the conversion.

To go from Kilometers to miles: simply click on the button marked
From Metric

Square Centimeters To Square Inches

This will convert centimeters squared to inches squared & reverse.

Enter the number you wish converted
ex 12 inches squared
and click on the function button labeled

To Metric

Click on cm^2 in^2
This will complete the conversion.

To convert from Square Centimeters to Square Inches simply click on the button marked
From Metric

Cubic Centimeters to Cubic Inches

This function will convert cubic centimeters to cubic inches.

Enter the number you want
ex 12 inches
and click on the function button labeled

To Metric

Click on cm^3 in^3 .
This will complete the conversion.

To convert from Cubic Centimeters to Cubic Inches simply click on the button marked
From Metric

Cubic Meters To Cubic Feet

This function will convert centimeters to inches & reverse.

Enter the number you wish converted

ex 12 feet

Click on the radio button labeled

To Metric

Then click on m^3 ft^3

This will complete the conversion.

To convert from Cubic Meters to Cubic Feet simply click on the button marked

From Metric

Liters to US Gallons

This function will convert liters to US Gallons and reverse.

Enter the number you wish converted

ex 12 Gallons

Click on the radio button labeled

To Metric

Click on L US Gal

This will complete the conversion.

To convert from Liters to US Gallons simply click on the button marked

From Metric

Grams To Ounces

This function will convert Grams to Ounces & reverse.

Enter the number you wish converted
ex 12 Ounces
and click on the function button labeled

To Metric

Click on g -- oz.
This will complete the conversion.

To convert from Grams to ounces simply click on the button marked
From Metric

Liters To Imperial Gallons

This function will convert Liters to Imperial Gallons and reverse.

Enter the number you wish converted
ex 12 Imperial Gallons
and click on the function button labeled

To Metric

Click on L IMP Gal
This will complete the conversion.

To convert from Liters to Imperial Gallons simply click on the button marked
From Metric

Celsius To Fahrenheit

This function will convert Celsius to Fahrenheit & reverse.

Enter the number you wish converted
ex 12 degrees Fahrenheit
and click on the function button labeled

To Metric

Click on C F.
This will complete the conversion.

To convert from Celsius to Fahrenheit simply click on the button marked
From Metric

Square Meters to Square Feet

This function will convert Square Meters to Square Feet & Reverse.

Enter the number you wish converted
ex 12 Square Feet
and click on the function button labeled

To Metric

Click on $M^2 \rightarrow FT^2$
This will complete the conversion.

To convert from Square Meters to Square Feet simply click on the button marked
From Metric

Milliliters To US Fluid Ounces

This function will convert Milliliters to US Fluid Ounces & reverse.

Enter the number you wish converted
ex 12 US Fluid Ounces
and click on the function button labeled

To Metric

Click on mL US FL OZ.
This will complete the conversion.

To convert from Milliliters to US FL OZ simply click on the button marked
From Metric

Kilograms to Pounds

This will convert Kilograms to Pounds & reverse.

Enter the number you wish converted
ex 12 Pounds
and click on the function button labeled

To Metric

Click on kg -- LB.
This will complete the conversion.

To convert from Kilograms to Pounds simply click on the button marked
From Metric

Milliliters To Imperial Fluid Ounces

This will convert Milliliters To Imperial Fluid Ounces & reverse.

Enter the number you wish converted
ex 12 Imperial Fluid Ounces
and click on the function button labeled

To Metric

Click on ml IMP FL OZ
This will complete the conversion.

To convert from Milliliters to Imperial Fluid Ounces simply click on the button marked
From Metric
