

Expand Unit

The Expand unit contains the declarations for the ... components.

When you add a component declared in this unit to a form, the unit is automatically added to the **uses** clause of that form's unit. The following items are declared in the Expand unit:

Components

TExpand

Objects

Types

TOverwriteEvent

Constants

Variables

Routines

Exceptions

EExpandFileBad

EExpandFileNotFound

EExpandNoFiles

To see a listing of items declared in this unit including their declarations, use the ObjectBrowser.

[Example](#)

Applies to

[TExpand](#) component

Declaration

```
property ExtractDirectory: String;
```

Description

The ExtractDirectory property ...

ExpandedFileName Property

[Example](#)

Applies to

TExpand component

Declaration

```
property ExpandedFileName: String;
```

Description

The ExpandedFileName property ...

MoveFiles Property

[Example](#)

Applies to

TExpand component

Declaration

```
property MoveFiles: Boolean;
```

Description

The MoveFiles property ...

Overwrite Property

[Example](#)

Applies to

TExpand component

Declaration

```
property Overwrite: TOverwrite;
```

Description

The Overwrite property ...

Extract Method

[Expample](#)

Applies to

TExpand component

Declaration

```
function Extract: Integer;
```

Description

The Extract method ...

OnNextFile Event

[Example](#)

Applies to

[TExpand](#) component

Declaration

property OnNextFile: [TNotifyEvent](#);

Description

The OnNextFile event ...

OnOverwrite Event

[Expample](#)

Applies to

TExpand component

Declaration

property OnOverwrite: TOverwriteEvent;

Description

The OnOverwrite event ...
