[Copyright/License/Warranty](#)
[Software Registration](#)

Procedures

To install HALT, copy the executable and help file, HALT.EXE and HALT.HLP respectively, into a directory.

HALT runs as an icon in the background until you double click it to end the Windows session. To run halt automatically, each time you start up Windows, create a program item in the StartUp group.

Options

You can modify HALT's basic operations with the following command line keywords:

ontop HALT will always show through other windows, even if the other window is maximized.

now HALT immediately ends your Windows session when double clicked (or invoked) as a program item. In this case, HALT is never even running in the background.

Disclaimer Of Warranty

This software and documentation are provided "as is" without warranty of any kind. Sawbuck Software further disclaims all implied warranties, including without limitation, any implied warranties of merchantability, fitness for a particular purpose or against infringement. The entire risk arising out of use, distribution or performance of the software and documentation remains with you.

In no event shall Sawbuck Software or its suppliers be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information or other pecuniary loss) arising out of the use of or inability to use the software or documentation, even if Sawbuck Software has been advised of the possibility of such damages.

Because some states do not allow the exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

Copyright/License/Warranty

HALT. Copyright (c) 1992-1994 by Sawbuck Software - All rights reserved.

Program item

Procedures for creating program items are described in your windows documentation or can be accessed on-line in the creating and deleting program items topic of the PROGMAN help file, PROGMAN.HLP.

Command Line

You can define command line arguments when you create the program manager item with Progman. Simply type the desired keyword in the 'Command Line' field of the Program Item Properties dialog. If you created the item by dragging the file from the File Manager, you can access this field by selecting the HALT item in the Program Manager and choosing 'Properties' from the 'File' menu of the Program Manager.

Good Job!!!

Of course it works a lot better if you click on the icon of the running program.
