RWPclock

The following files are included in rwpclock.zip :
> rwpclock.exe -- the executable file (obviously)
> rwpclock.wri -- this file
> threed.vbx -- required Visual Basic control

ADDITIONAL FILES REQUIRED BUT NOT INCLUDED :
> vbrun300.dll

<u>INSTALLATION</u>
Copy the file threed.vbx into your "windows/system" directory. The file vbrun300.dll must
also reside in this directory. The file RWPclock.exe can be installed into any directory.

<u>RUNNING RWPclock</u>
Executing the RWPclock.exe program displays the clock on the screen. The clock can be moved by dragging with the left mouse button. Clicking on the clock with the right mouse displays an information/setup dialog box. The following menu selections are available from this dialog box :
> "kill" -- Stops the running of RWPclock
> "Set" -- Allows the user to set the time
and date.
> "Colors" -- Allows the user to set both the
clocks foreground and background colors.
> "Alarm" -- Allows the user to set an alarm
and display a message
