5/09/1996
Version 2.051

Welcome to QuikLink Explorer!

It is my hope that you find **QLExplorer** a valuable companion as you surf the net. With **QLExplorer**, you can organize your favorite web sites in a most familiar manner. The **QLExplorer** interface is design to work just like the Explorer on   your Win95 machine or WinNT 4.0 machine. You can create and nest folders, and within them store links to your favorite sites. Just double click on the site you wish to go to and **QLExplorer** sends the necessary information to your web browser, and if your browser is not open, it will open it for you!   To store a web site in **QLExplorer**, simply press the Get URL button on the toolbar and it will get the information from the current browser and store it in the current **QLExplorer** folder.

Supported Browsers:

QLExplorer will work with any browser via copy and paste, but is automated for:

Netscape Navigator,
MS Internet Explorer,
Spyglass Mosaic,
Spry Mosaic,
and NCSA Mosaic.

Features:

Names   up to 255 characters long
Nested Folders
List View
> View Large Icons
> View Small Icons
> View List
> View Details
> Sort by Name, Date, Type, URL, or Client Browser!

Tree List View
> An easy way to navigate between folders

Drag and Drop between files and folders and both views
Cut/Copy/Paste functions
Property windows allowing you to edit your entries and add full length descriptions.
Automated browser support:
> Send URL to Browser
> Get URL from Browser
> Auto-load Browser
> Will find a specific browser among different open browsers

Maintain multiple databases.
Import and Export URL files, Bookmarks and Hotlists from:
> Netscape
> NCSA Mosaic
> MS Internet Explorer
> Spry Mosaic
> Spyglass Mosaic
> any HTML document
> and other QuikLink Explorer databases

Add your own entries manually

Assign Specific browsers to specific sites (ie: MS Internet Explorer to Iexplorer enhanced sites. Netscape to Netscape enhanced sites...)

Minimize the program to the Taskbar or the **SystemTray**!
Change fonts in the Viewing windows
Improved keyboard support
Now supports Windows 95 Explorer file associations.
Rename folders from the tree/folder view.
Open HTM/HTML directly as QuikLink database files.

NEW FEATURES!

Now you can run QuikLink Explorer in a single pane or dual pane mode
(the

difference between Windows Explorer and My Computer)

Improved color support for users running custom themes.

Improved 640x480 resolution support.

Improved Keyboard support as per the Windows User Interface Guidelines

Plans for later versions include:
Custom Icons
Full browser DDE or OLE support

Registration Info-

QLExplorer is *NOT* freeware, it is shareware. If you find it useful and intend to continue to use it, you must register the program. Registration fee is merely **$10.00** and you can register the program via the **Compuserve Shareware Registration Database** under **ID# 10074**, or via snail mail to the address under technical support.

NEW!
You may   now register **QL**Explorer via email, fax, and mail. Payments types including credit card, check or money order and cash. From within **QL**Explorer, you

may register via the **HELP** menu, **About** dialog box, and the **Nag** dialog box. Or run the **REGISTER.EXE** program found in the **QLExplorer** program folder.
