

# Introduction

The purpose of this program is to automate the process of swapping various WINSOCK.DLL files for those of you who use more than one Internet service provider with your default Web Browser. With one quick double-click, you can swap up to three DLL's, and optionally launch the browser of your choice.

**Winsock Swapper will only look in your WINDOWS directory** for your WINSOCK.DLL files, so if you happen to have them anywhere else, you must move them there. If you have two different versions of the file, change the file extension of **one** of them to coincide with the appropriate provider. For example, if one of your providers is America Online, change the AOL Winsock file name to WINSOCK.AOL. **You must leave one of your files named WINSOCK.DLL, or Swapper will get confused.** It works by looking for the file extensions you have specified, and assumes that the WINSOCK.DLL file is associated with the extension that it doesn't find. Additionally, if you are swapping DLL's between different **32-Bit** Web browsers, there is another file, WSOCK32.DLL, which must also be swapped. This DLL must be in your WINDOWS\SYSTEM directory, and must be renamed to coincide with your WINSOCK.DLL files. Once you have done this, select Setup from the Options menu, and follow the simple instructions, which can be accessed by clicking on the Help button in the upper right corner, and selecting the appropriate field of inquiry.

Once you're up and running you can obtain complete file and version information about the WINSOCK.DLL file associated with each option by right-clicking on that option in the **"Select Provider"** area of the main screen.

# Registration

**CT Software**  
759 Galleon Lane - Elk Grove, IL 60007  
USA  
1-800-617-7740

If you wish to register the program, we do accept **VISA** and **MASTER CARD**. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **\$10.00**. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you prefer mail, please send a check in the amount of **\$10.00** to the above address. Be sure to include your name, address, e-mail address, and the exact name of the program, so that we can immediately send you the registration information. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

Upon receiving the check, we will e-mail you the registration code **immediately**. If you have any questions or comments, please don't hesitate to drop us a line. To reach **CT Software** by e-mail:

If you are a CompuServe subscriber, this program can be registered in the SWREG forum. The registration number is **10084**.

# CT Software Home Page

Please feel free to visit our WEB site, from which you can download software, and access complete product descriptions of the very latest versions of all of the shareware offered by CT Software, in addition to offering links to other excellent shareware sources. The **CT Software Home Page** URL is:

["http://members.aol.com/ron2222"](http://members.aol.com/ron2222)

Enter the name of your service provider here, as you want it to appear under **Select Service** in the programs main screen. You can enter up to 3 different services in this field.

Enter the file extension for the swapped WINSOCK.DLL files here. For example, if the first service provider you list is “America Online”, you might want to enter “AOL” here. When you are accessing your Web browser with another service, *Winsock Swapper* will rename AOL’s Winsock file WINSOCK.AOL. **It is very important that you go into Explorer or File Manager and actually rename your files to coincide with the file extensions entered here.** *Winsock Swapper* has no way of knowing which Winsock file is which, so you must initially let it know.

Enter the path to your Web browser here. Select the appropriate radio button, and then click on the **Browse** button to specify the path. You must do this for each option you use. Once entered, *Winsock Swapper* can optionally launch your browser at the same time it is swapping files to match your selection.

When *Winsock Swapper* opens, the currently selected Winsock file is indicated. Double-clicking on the server of your choice will swap the file (if indicated), and close the program, optionally launching the default browser. You can obtain complete file and version information about the WINSOCK.DLL file associated with each option by right-clicking on that option.

Select the appropriate radio button here before specifying your Web browser. You must specify a browser for each option you intend to **Launch** from *Swapper*.

If the "Launch Web browser" box is checked your default browser will automatically launch upon closing the program by hitting the launch button. If it is unchecked, the button caption will read "OK", and the program will save any changes you have made and simply close.

# Other Programs by CT Software

## CT HotSpot

**CT HotSpot** is a small utility with which you can create 2 hotspots - 1 to turn your screensaver on, and the other to turn it off. This can be quite useful when downloading a large file, doing a tape backup, or when using the Windows 95 utility, *DEFRAG*. Having a screensaver come on during any of these activities can wreck havoc with your computer and your files.

## DiskCopy

**DiskCopy** is a simple little 32-Bit program for formatting and creating duplicate disks. **DiskCopy** will prompt you for the number of copies you have in mind, making for a very quick operation. **DiskCopy** does not perform an actual track by track copy, it simply copies the directory structure and files, but 99% of the time, that is all that is really required.

## Notebook for Windows 95

There is one, and only one point to this program - to replace Notepad. **Notebook** is not a word processor. It's sole purpose is to view and edit text files. **Notebook** does have 6 major features (and several minor ones) which we believe make up for Notepad's inadequacies:

1. It will open **very large files**, and allow you to edit them.
2. It features full font control - you can set the font name, style, size, and color, and your settings will be saved when you exit the program. It will look better on your screen, and do a much better job of printing.
3. **Notebook** has a toolbar complete with help balloons.
4. **Notebook** features *DRAG AND DROP* text editing. If you want to move a block of text, just use the mouse to select it, and drag it to where you want it.
5. **Notebook** supports overtyping mode. While the default editing mode is insert, hitting the INSERT key on your keyboard will change that to overtyping.
6. **Notebook** can both print and/or save to a file **selected text only**, if desired.

## Safety Net

**Safety Net** is a highly acclaimed utility for backing up key files by file extension. It has one default setting - to backup key "windows" and system files including INI files, Registry Files, CONFIG.SYS, and AUTOEXEC.BAT- and 5 user configurable options. **Safety Net** could easily backup all of the document and/or database files on your drive, for example, with the directory structure **intact**, and it can ZIP them to disk (*PKZIP is required for this option*)! **Safety Net** can also print file lists, print your directory tree, and make a boot disk.

## YahtC

This game is a clone of the immensely popular game, Yahtzee. **YahtC** combines attractive 3D graphics with extreme ease of use. There are no complicated instructions, and no hidden forms. Each player's score is always visible. A sound card, while certainly not necessary, will greatly enhance the game, which produces sound effects when a player rolls the dice, "zeroes" out a scoring category, or rolls a "YahtC". The game will also keep a permanent record of High Scores, which can be easily cleared at any time. **YahtC** is fully functional, and supports up to 4 players.
