

# ICCD 3.2

© THIRY Laurent, 1994-1996. All rights reserved.

I created this little program, because I didn't like the audio CD Player that comes with Windows 95. The display was small, and it was hard to select the track you wanted.

**ICCD 3.2** is a Audio CD player designed for Windows 95. It is a real 32 bits program that offers a lot of nice cool features like:

- Stores track name and disk title
- Microsoft Audio CD Player Database compatible
- 255 tracks of programation list
- Fast access grid
- Supports over 65535 colors
- Random, repeat and repeat one play
- Multiple time display selection (elapsed, remaining, from start, to end)
- Autorun (when you insert an Audio CD in your player)
- Tray bar compatible
- ... and a lot of other exiting features.

This program is not free. If you use it after the 30 days test period, a fee is required. Send \$10 or 50 FF to the author:
