

Screen Loupe for Windows v1.7

Copyright (c) 1991-1996 by Gregory Braun. All rights reserved.

This software is free. You may copy and distribute this program as long as all copyright notices remain intact and the application files are not modified in any way.

Loupe displays a magnified view of whatever is beneath the mouse cursor, much like a printer's or jeweler's loupe.

Loupe continues to operate when minimized. The program name is replaced by the current mouse coordinates.

Loupe also displays information about the current hardware configuration and dynamic system resource usage as well as an ASCII chart, MS Windows error codes and Horizontal and Vertical rulers.

You may copy the current contents of the Loupe window to the clipboard using Ctrl+C, (using the Copy item on the Edit menu will simply copy the menu itself). Make Loupe the active window, place the mouse over the area to be copied and press Ctrl+C to copy the Loupe display at the current magnification rate to the clipboard.

If you have comments, questions or find any bugs in ToolBar feel free to contact me on CompuServe or America Online.

If you would like to be notified when this application is upgraded send me an e-mail message with your on-line address. I'll send you a message when a new version of Loupe is uploaded to CompuServe and AOL.

While Loupe is offered as FreeWare, if you feel that you want to pay something for it you are welcome to send any amount you wish.

LOUPE.ZIP File Descriptions

LOUPE.EXE - The utility application.
LOUPE.WRI - The documentation file.

Release History

- v1.0 Original in-house development and testing.
- v1.1 Added clipboard facilities.
- v1.2 Added system resource display, ASCII character chart and Configurable refresh rate.
- v1.3 Added MS Windows Error Codes and startup splash box.
- v1.4 Added Horizontal and Vertical rulers
- v1.5 Included CTL3DV2.DLL in the Zip file to handle 3-D dialog boxes and controls.
- v1.6 Removed CTL3DV2.DLL from the zip file. This DLL is no longer required. Fixed several minor bugs.
- v1.7 Add facility to copy ASCII Chart characters to the clipboard. Moved all strings to the resource segment for future foreign language translations.
