Win Tray 96 help

Help file produced by **HELLLP!** v2.7 , a product of Guy Software, on 5/19/96 for G. L. Liadis.

The above table of contents will be automatically completed and will also provide an excellent cross-reference for context strings and topic titles. You may leave it as your main table of contents for your help file, or you may create your own and cause it to be displayed instead by using the I button on the toolbar. This page will not be displayed as a topic. It is given a context string of `__` , but this is not presented for jump selection.

HINT: If you do not wish some of your topics to appear in the table of contents as displayed to your users (you may want them ONLY as PopUps), move the lines with their titles and contexts to below this point. If you do this remember to move the whole line, not part. As an alternative, you may wish to set up your own table of contents, see Help under The Structure of a Help File.

Do not delete any codes in the area above the Table of Contents title, they are used internally by HELLLP!

## Introduction

Shareware is copyrighted software that is distributed by authors through bulletin boards, on-line services and disk vendors.

Shareware allows you to try the software for a reasonable limited period. If you decide not to continue using it, you throw it away and forget about it. You only pay for it if you continue to use it. Shareware is a distribution method, not a type of software. You benefit because you get to use the software to determine whether it meets your needs, before you pay for it.

The Shareware system and the continued availability of quality Shareware products depend on your willingness to register and pay for the Shareware you use. It's the registration fees you pay which allow authors to support and continue to develop our products. Please show your support for Shareware by registering those programs you actually use.

Even if the person who supplied you with the software tells you that registration is not necessary, be assured that if the copy of the program presents a screen reminding you to register, then the author has not been paid for that copy and registration is necessary.

Copyright 1992-1996 G. L. Liadis Software, Ltd.

## Win Tray 96 help

Win Tray 96 v5.0 is a utility that allows you to install icons on the system tray and run the application by clicking on the icon. The programs allows you to add as many as 8 icons and se any parameters for the application.

### **Setup.**

Once Win Tray is up and running click on the browse button to bring up the dialog box that allows you to find any program that you wish to add to the system tray. select the program then press the open button to add the program to your list. Once you have adjusted the icon and any parameters press the ADD button to add to your list.

Select all the programs and icons you want to add to your list click the OK button and you should see all the icons appear on the System Tray.

To remove a program from your list and the System Tray highlight the program then click on the delete button, you can also modify by highlighting the program and clicking on the modify button.

To add or remove icons from the System Tray click on any icon in the Tray with the right mouse button to bring up the setup screen.

Code password is e-mailed to you within 2 hour of registering on CIS 24 hour per day 365 days

WinOrgan is a simple program that simulates a piano keyboard that you can play with a mouse. It offers volume adjustment and a 127 instrument selection. When you click the keyboard with the mouse to play notes, colorful icons are displayed on the screen.

### Win Match

Win Match supports SOUND CARDS, MIDI & PC's Speaker. Atach WAVE files for SOUND Effects & MIDI files for background MUSIC when you play the game.

Password is e-mailed to you within 2 hour of registering.

In Win Match the cards are delt in a 4 x 4 GRID. The object of the game is to move the face cards to the top three rows, with the Kings on the top row, then Queens, then Jacks while removing all none-face cards one-pair at the time. An very INTERSTING & CHANGELING game.

### Win Block

Featured in several CD's & Magazines.

Password is e-mail within 1 hour of registering

Win Block 3D is a very interesting game the object is to finish with more pieces than your opponnet. You take pieces by surrounding an opponnets on two sides in any direction which includes diagonally. You may only make a move when you can take an opposing piece. If no moves are available the computer will forfeit your turn. The Easy, Hard, and Difficult Levels puts you against the computer.

### Win Simon

Win Simon is a game of memory and skill you must match the images and notes with those played by Win Simon. This is a very addictive game with over 200 levels of play.

**Coming soon.**

Space Wars  
Space Shuttle  
Several new arcade games
