About the Shareware Edition

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware and freeware* programs, and features, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for!

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition *is shareware itself*

This useful and fascinating electronic magazine deserves your readership and shareware subscription. We hope you find this weekly publication of great value and interest and become a regular reader. If you do, please **register your readership** for a nominal fee. Those who register get a very special **BONUS**:

A FREE SAMPLER MEMBERSHIP to **Windows OnLine™ (BBS)**. See the registration options section for details.

We welcome you to the **WinOnLine™ Review™ Shareware Edition**. Your interest is

valued and we'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at 1-510-736-8343 or write to,

Welcome to the WinOnLine™ Review™ SHAREWARE EDITION

I'm soooo lonely! You have no idea what it's like to hang around this BBS with no friends in the area. I guess if I had my green card I could wander about and make new friends, but then The Boss would have to pay me more than just room and board. *(Like what this monster eats each week doesn't constitute a week's salary! - Frank)*

Please drop me a note on Windows OnLine (BBS) or c/o Windows OnLine, P.O. Box 1614, Danville, CA 94526-1614. I'd love to hear from you. Tell me what you think of the Shareware Edition. Funny, sarcastic, interesting and laughably dull letters will be published here.

DOS still rules

We may be the WinOnLine Review Shareware Edition, but notice our new files listings. The new DOS files outnumber the new Windows files by two to one. No doubt that Windows is gaining, but allow me to point out that Windows OnLine is not devoted exclusively to Windows. We still have an incredible number of primo DOS files with more coming each week. So if you straddle the line between Windows and DOS (and maybe even dabble in OS/2) this is the place to be.

This Week in WOLRS

We are enormously pleased to be the first U.S. board to offer the new update to that fantastic shareware program from **Lirpa Loof of Sweden**. This release is the first to include a full English translation which prevented many users from trying it in previous years. Don't miss it and the many other shareware programs we've previewed for you here in the **WinOnLine Review Shareware Edition** this first week of April.

Enjoy!

WORLD TIME

Whaddya want Wolly? It's 2 a.m. here!!!

Sorry, Bob (East Coast Editor). It's only 11 here in California. That's why the Windows OnLine BBS is *here* on the West Coast. We've got **three more hours** to operate each day that those East Coast boards! HA! I guess I should look at this World Time program before I call Hong Kong. (*Don't tell Frank*) Who knows what time *they* think it is right now?

Three time zones can be shown on the World Time display: **where you are**, **GMT** (Greenwich Mean Time - from soggy old England) and a **location you can choose yourself**. Many obscure places (*New Jersey?!?*) around the world are already a part of the database, and more can be added. So, Bob, since you're up, download [TIMZNA13.ZIP](#) (27K) and get with it! It's **freeware**, so you don't even have to register. I think I'll call Randy (West Coast Editor). At least **he** knows what time it really is.

WALLPEEPER

Quick wallpapering, prepasted

WallPeep for Windows lets you **scroll through all the BMP, WMF, DIB, RLE and ICO files** on your hard drive in a single list to see them previewed in a tiled format as **wallpaper**. It will build a listing of all those eligible files on your C drive (why not my D drive?) to scroll through. Despite its assurances, I always got a "can't load that picture" when encountering RLE files. You can choose to install a selected file as your wallpaper, or automatically open Paintbrush to edit it first. Files can also be located and listed by individual directory. [WLPEP111.ZIP](#) (27K) is **freeware** from Wilson Smith and Carole Rogers.

WALL PIX

More wallplay . . .

Wallpix provides the ability to **preview and "hang" wallpaper** from BMP files and **choose the opening sounds from your WAV files**. Create a library of configurations (profiles) from which you can choose, or select randomize and never know what will greet you when you next start Windows. The garishly colored but fun to view interface supports drag and drop, and BMP files are automatically sized for a thumbnail view. A tour option is supplied to experience each of your saved profiles. **WALLPIX.ZIP** (29K) is yours for a \$10 registration fee.

WIN ANSI

A line about ANSI

WinANSI answers the age-old question: how **can I edit ANSI display screens without exiting Windows?** The answer is now YES! While it does not offer the flexibility of DOS like TheDRAW, WinANSI does provide all of the standard ANSI escape sequences and line drawing capabilities required for most ANSI BBS screens. WinANSI allows you to manipulate the actual ANSI escape sequences and then view the results of your editing session in a separate window. Give **WANSI17U.ZIP** (133K) a shot and register it for only **\$15.00**.

WIN PREVARICATOR

The Ultimate Windows Utility from Sweden

I thought I'd seen everything 'til the famous Swedish shareware company Lirpa Loof issued Win Prevaricator. This is an **entirely new concept** which I find amazing that no one has produced before. Simply stated, Win Prevaricator **monitors the state of each** of your applications with links to the same dynamic link libraries, keeping complete track of their precedence within their hierarchy and restores them to first priority when necessary. This may not seem like an advantage at first glance, but it is amazing what it does for your **recovery speed** and WinMark ratio. Of course, your benefit will depend upon the status of your page swapping within memory and whether or not you even have a word processor open to a page.

However, due to the strict limitations of Lirpa Loof, this file is only made available once a year, on April 1st, and then immediately pulled from circulation. **Win Prevaricator is no longer available to the general public until next year**, when it will again appear briefly on April 1, 1994. **It is no longer available from WOL.**

If you haven't yet noticed, those Swedish geniuses of *Lirpa Loof* got their name by taking an American tradition and spelling it backwards: *April Fool!* from Wolly. You've been had! <g>

STOP

in the name of love . . .

Windows "**Quick Exit**" programs are another popular programming exercise, perhaps second only to file deletion trash cans. Stop is a shareware entry remains in icon form awaiting your eventual departure from Windows alongside that trash can. When activated, it doesn't just dump you out like many others. Stop essentially **requests all open applications to close themselves**, thus allows each to execute it's own shut down procedure. For instance, a program that has an open file that has been modified can take this opportunity to ask the user to save the file before exiting. Wolly was pleased that Stop gave him the opportunity to save this file before it did its work. Register **STOP21.ZIP** (6K) for just \$5.00.

WAVE AFTER WAVE

Music soothes the savage breast

Simple in operation, Wave after Wave gives you the option to **play WAV and MIDI files**. Choose a directory and then highlight a file, and click on Play to hear it. Hit Auto Play and hear every file in sequence. Careful, the continual play may seize control of your machine, never allowing you to move your mouse to stop it! Access Recorder or a program of your choice from within Wave after Wave. Depending on your collection, this could be Wave after Wave of nausea. Register **WAWAW202.ZIP** (49K) for **\$15.00**.

WIN EXIT

Exit, stage left . . .

Ah, the *torture* of clicking all over the screen to leave Windows, or worse, to leave and then reboot. Win Exit lies in wait at the lower right corner of your screen, patiently in **anticipation of your eventual departure**. But Win Exit doesn't just unceremoniously dump you out, it **offers five choices**: Exit Windows, Restart Windows, Reboot your computer, Cancel, or dump WinExit from memory. How convenient. G.L. Liadis Software suggests you "Have fun and please register" **WINEXIT3.ZIP** for **\$5 plus \$2 shipping**. Parting is such sweet sorrow.

TRUE TYPE FONTS

This week's entries:

PCORNAME.ZIP (45K) PC

Ornaments

Caliph

CALITT.ZIP (42K)

Wet Paint

AGWP-T.ZIP (16K)

AMDNTT.ZIP (83K) American Indian

Ah ho ma tuk wa hussen (an Indian greeting describing all is great with life in the world). The last glyphs shown is the American Indian Truetype. This font contains sample pictographs of certain American Indian tribes that one could use for clip art, calendars, logos and American Indian studies. An interesting addition to your collection; this font is shareware at \$11.50. A WRI file is included which provides a meaning for each glyph.

Caliph and American Indian are also available in Adobe in this week's new files.

HI-LO

TV's Card Sharks comes to Windows

Hi-Lo is a simple **card game** which has made it to TV as "Card Sharks". Mathematically speaking, sustained enjoyment of this game is inversely proportional to the IQ of the individual. **HI-LO.EXE** (61K) is appropriately provided as a self-extracting archive. While **freeware**, a \$5 bill and a disk to the U.K. will bring a disk with the full version (OH, NO!) of Hi-Lo as well as five additional games.

MESSAGE PAD

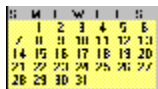

While You Were Out (goofing off)

Message Pad says it's a **telephone message system** that supplements or replaces the traditional "While You Were Out" message pad. Message Pad utilizes the messaging services (MAPI) provided by Windows for Workgroups and Microsoft Mail 3.0. It requires a post office and user accounts created with either **Microsoft Mail 3.0** or the Mail application provided with **Windows for Workgroups**. Wolly couldn't try this 'cause he doesn't have W4W and nobody will let him on any LAN. Perhaps you will want to look at **MSGPD11.ZIP** (126K) and register it for \$25 for a two user license or \$50 for five users; see the REGISTER.WRI file for additional information.

WIN CAL

An exercise in largess and largeness

Win Cal packs a nice Windows install program into it's whopping 342K download. **VBRUN200.DLL, THREED.VBX and GRID.VBX** are included in the archive to make it all work (just what I've always wanted). The pretty install program deposits the massive **13K EXE** in its own directory and the **freeware** program provides a peek at three contiguous months. Browse amongst the months and years. No inconvenient alarm or appointment features to learn, just a three-month calendar. Whoopie! (BEEP! BEEP! ---Wolly sarcasm alert!) **WINCAL1.ZIP** (342K) is like receiving a large box, prettily wrapped, containing a pack of gum. At least it's **freeware**.

Wolly's Shareware Frowns:

Wolly's really bugged with shareware authors blowing up their archives by including VBRUN200.DLL! You, too??? For example, WinCal provides *less than 100K of program files within its 342K download* - the rest is our old pal VBRUN! This makes no sense for a BBS download.

Authors, please don't include VBRUN200.DLL anymore. Refer to it, tell us that it's required in your FILE_ID.DIZ, but don't waste my valuable phone time & bytes. Thanks!

Detour 1.4

One of the unique features of Windows is the ability to *Associate* data files with executable files. Rather than first loading a word processing program, then loading the data file to edit, you can simply click on the name of the data file and the word processor will load itself and the data file. This all works automatically. Automatically, that is if you have the proper associations setup in your WIN.INI and File Manager. But as useful as this feature may be, it can also be a real hassle.

The main limitation of the *Associate* feature is that you can only set one association for any extension. If you normally use Word for Windows for most of your *.DOC files, you can set the association for all *.DOC files to Word for Windows. Actually, when you install Word for Windows, the program automatically sets this default for you. However, if you occasionally like to use Windows Notepad, Windows Write, or another text editor to perform simple operations the *Associate* function will only load Word for Windows when you click on the file name. To avoid loading Word for Windows you must first load the text editor, then find the text file you want to edit. I've often wondered why the programmers who created the Associate feature were so short sighted.

A few issues back, even Wolly voiced his frustration with this limitation of the *Associate* function. The answer to this problem is a program that permits multiple associations for each extension. After searching around awhile, I've found there are a few multiple association programs available as shareware. Having tested approximately six of these programs, I've decided the best of the bunch, and hence the only one I can recommend is [Detour 1.4](#).

The [Detour](#) program, offers a range of options in an unobtrusive package that only occupies 25k of your valuable hard disk space (and that includes the DETOUR.WRI. Without this text file the program is about 9k). Unlike similar programs that place an icon on the screen, the [Detour](#) program is completely invisible until you need it.

The program is very easy to install. Once unzipped, simply place the DETOUR.EXE, DETOUR.INI, and DETOUR.WRI (if desired) in your Windows directory. Then, with a text editor, like NOTEPAD, open your WIN.INI file to make a few changes. As a precaution, always make a backup copy of the WIN.INI before making any changes. Find the section heading

called [Extensions] and look for the extension you want to change. Say, for example you wish to change the DOC extension. Look for the line that reads:

```
[Extensions]  
doc=winword.exe ^.doc
```

and change this line to read:

```
doc=detour.exe ^.doc
```

Then either create a new DETOUR.INI file, or modify the sample furnished with the program, to redirect the DOC files to the desired editors. These entries in the DETOUR.INI file will appear as:

```
[Detour]  
DOC1=notepad.exe,Notepad^1  
DOC2=write.exe,Write^1  
DOC3=c:\wpwin\wpwin.exe,WP Win^1  
DOC4=c:\winword\winword.exe,WinWord^1
```

These entries not only redirect the DOC file to the proper editor, they also establish the names shown on the screen buttons:

The ^X value shown last in each entry is the run option for each application. These values may be ^1 through ^7 and mean the following:

- ^1 - Normal with focus
- ^2 - Minimized with focus
- ^3 - Maximized with focus
- ^4 - Normal without focus
- ^7 - Minimized without focus

The final step in setting up the **Detour** program is in your File Manager. Here click on the **File** menu and access the **Associate ...** command. Type in the extension you want to change in the **Files with Extension:** box. Check to make sure the program in the **Associate With:** box reads DETOUR.EXE. Once this is accomplished your installation is complete.

But, DOC files are not the only application for this versatile little utility. I also use Detour for my TXT, BMP and PCX files. Here rather than simply loading a single default program, each time I need to work on these files, I have the option of using several different programs.

So, the next time you need to call up a DOC file, just to see what it is, you don't need to automatically load the Word for Windows program. Rather, you have a choice of programs to run. With the **Detour** program, you and not the computer decide what program to activate. The next time you see the message: file too large for Notepad, all you'll need to do is re-click on the file and select another editor. Detour is one of the most indispensable programs I have on my system and since the program is freeware, you cannot beat the price. Members of Windows OnLine can find **Detour** as DETOUR14.ZIP in Directory #150 - (Windows-New Uploads) .

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file

listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

TOP TEN REASONS to Register Your Readership

The **WinOnLine Review Shareware Edition**
is *shareware itself*.

10. **IT'S CHEAP!** As little as .00001893074581431 cents per second!
9. **NO NAG SCREENS!** (But if the publisher's wife ever gets your phone number, boy are *you* in for it!)
8. **FREE SAMPLER MEMBERSHIP** to the **Windows OnLine™ (BBS)** for instant gratification and access to 5 megs of these super files (see details).
7. Paul Schaeffer has no involvement with WOL house band.
6. **Save download time and money!** Feature Reviews and Shareware Briefs give you the inside track on what's good and bad.
5. **Plea\$e Help!** Someone stole the Bill Gates hood ornament off the Publisher's Yugo.
4. It's just the *decent thing to do* (can we book you on a one-way guilt trip? All aboard!)
3. Our Research and Development Department is very close to a Scratch and Sniff popup. (just ponder what we could do with *that!*)
2. **NO WAITING!** The **Shareware Edition** comes out **weekly** with the news of the *latest programs, files and updated drivers* available to bulletin board users. No print publication can match our quick response time!
1. We can afford Kibbles & Bits for Wolly instead of the generic brand.

The Details:

After you read this issue you'll see for yourself what a **valuable tool** it is for your search for the *ultimate in shareware and new files*, please subscribe to this publication. **You should subscribe** because the only way for this publication to continue and grow is if **YOU** support it and **register your readership**, which is like buying a subscription. Please read these details of what you get for Registering your Readership to the WinOnLine Review, Shareware Edition. We want to be completely clear on your rights to read the magazine and the details of the bonus Sampler Membership to Windows OnLine™ (BBS):

+ Your Registration entitles you to read up to 52 issues, (past and future), of the WinOnLine Review Shareware Edition. The publisher reserves the right to change publication schedules and/or modify the magazine without notice.

+ The magazine will be available for download from Windows OnLine™ (BBS) from a free file area; it may also be available from a local BBS or other service to which you are a member. Your shareware registration **does not include delivery of the magazine in the form of any media**, nor does it assure its continuing availability from any source other than Windows OnLine™ (BBS).

+ Your Bonus Sampler Membership to Windows OnLine™ is for a term of fifteen days or 500 minutes of on-line time, whichever comes first. You are entitled, during that period, to download up to five (5) megabytes of files. Files which are designated as "free", such as filelists, WinOnLine™ Review™ publications, certain utilities, etc., do not count towards your five megabyte allowance.

If you register on-line, the fifteen day period of your Sampler Membership begins immediately.

If you register by mail, please allow up to ten days for processing (foreign members allow for mail delays). Your Sampler Membership time will begin the first time you successfully log-on with your specified name and password.

About Memberships

Windows OnLine™ Interactive Database Services

What does Windows OnLine™ offer it's membership?

1. FILES!

We have been told that we have one of the most extensive Windows file databases anywhere in the world. Because we are so discriminating, we supply you with some of the best and latest DOS, OS/2 files!

You won't find a lot of "junk" files on WOL. As our regular members know, we pride ourselves on having better file descriptions and, once our files are out of the recent uploads directory, unlike other bbs's, all of OUR file dates are CORRECT!

We have many features at WOL to make your Windows, DOS, OS/2 and other file collecting both fast and easy. We remove dupes and older files as fast as we can find them.

WE supply almost all files you see here. Therefore, you can be sure that you will see many new files every day, that is our pledge to our membership.

Is there more? ... you bet! But, We'll let you discover some of our innovations for yourself.

2. Network (Message) System

Receive support from within our own local message conferences, or access the world! Windows OnLine is your doorway to four international mail networks:

ILINK - RIME - SMARTNET - INTELEC

Explore over 650 separate Conferences that contain over 200,000 current messages on topics you're interested in .We have Windows Local, Windows Tips, and hundreds of internationally echoed conferences like Windows, Multitasking, DOS Tips, Languages, Tech Support, Microsoft Support and much more.

3. Doors

These external programs allow you to save your extra time for your next visit. Mail doors help manage your off-line mail and capture the our New Files listings, all automatically. We even have a Voting Door so you can express your views on the burning issues of the day, for fun and information.

4. **WinOnLine™ REVIEW™ Magazines:**

Read our NEW WinOnLine™ Review™ Shareware Edition

We offer TWO Windows Magazines. Past issues of the WOL NEWS, WOL *Weekly* and the WinOnLine™ REVIEW™ and NOW the Weekly Shareware Edition. All issues are downloadable from directory #100, and are FREE to Members.

5. **Bulletins**

We use bulletins to keep you informed of important information and discuss subjects that you want to know more about. They are posted as a valuable reference.

Details

All memberships with file privileges have their time given in eight hour blocks. That is, with each call you will start with 480 minutes. Time is given this way until you run out of minutes. We feel that this will be a great benefit to all callers who wish to call WOL once in awhile and download like crazy, such as on weekends. This eliminates any real need for saving your excess time. Your account is only charged for what you use.

Membership fees are non-refundable - memberships can not be upgraded or downgraded. You may purchase and use more than one membership at a time. Your

Membership expires when any one of your limits are reached. You can renew your membership at any time and your new membership will start when your old membership expires.

Windows OnLine™ reserves the right to deny membership or give a prorated refund to any existing member, at its option, for any reason.

PURCHASE YOUR MEMBERSHIP NOW!
