INTEROFFICE MEMORANDUM

DATE: September 16, 1991   FROM: Info. Center
PRODUCT: WordPerfect   VERSION: 5.1
RELEASE DATE: ALL
SUBJECT: Merge - Using {QUIT} With {CALL} And
{LABEL}

In an advanced merge using {CALL} and {LABEL}, when a {QUIT} command is encountered at the end of a label, the merge stops and the rest of the primary file and merge codes are placed on the screen. This is because the {QUIT} command in a merge stops the merge so users can save the file and remerge later. To alleviate the problem, users can change the {QUIT} commands to {GO}end~ and place a {LABEL}end~ at the very bottom of the file.

*This information is given strictly as a troubleshooting option.
