

## **WordPerfect Macro Programs and Services Available from Darkhorse Industries:**

CUSTOM MACRO/MERGE PROGRAMMING is available on a contract basis. For more information, write Darkhorse Industries (Box 709, Winterville, GA 30683) with a brief description of what you need to accomplish. Include your system specifications and phone number(s).

COMPOSURE is a menu-driven productivity enhancement system that runs under WordPerfect. Features: a time-saving, fully customizable generic style platform that helps bridge the gap between novice word processors and publishing professionals; easy input of all Latin alphabet-based languages; complete auto-coding character set lookup feature; a basis for working with other commonly needed symbols and languages like Russian and Japanese; a simple fraction generator, width calculator, and pica/points to points calculator; rules and callouts; style-based multiple attribute coding; and error cleanup/conversion aids. Custom Composure-compatible style files for APA, MLA, Turabian, Pagemaker, and Ventura are included, plus one "typeset" style and four useful outline styles. Programmer: Diane Kistner.

DOCDOC (Document Doctor) is an integrated set of WordPerfect 5.1 macros designed to facilitate cleanup and formatting of documents imported from other systems and/or other "typists." It provides for menu-driven or automatic operation. Special features include stripping and conversion of codes into generally accepted typesetting formats. Programmer: Robert S. King.

MACARUNI (that's "run" as in "see Spot") is a WordPerfect macro-based program designed to allow running macros and keyboards from any drive or directory. Macros may be grouped by category, listed in alphabetical order with a description for each file, and executed with ease from the list. Additionally, a quick key allows the user to run any macro in the database without first loading the description list. Macaruni uses a combination of macros and merge files to maintain a database in which you may add, delete, edit, or print records. Programmer: Robert S. King.

PERFETCH is a WP macro program designed as a shell to Keith Ledbetter's excellent hard disk file finder (SST). All SST options are supported and accessible through easy-to-understand menus. Additionally, the user may create a file list of search results from which a document may be retrieved into WordPerfect, including files within compressed archives (such as ARJ, LZH, PAK, ARC, ZIP, ZOO). Programmer: Robert S. King.

ZWIZ (ZIP Wizard) is a set of WordPerfect 5.1 macros designed as a full-featured shell for PKWare's popular ZIP archive programs. Both ZIPing and unZIPing are supported, as well as the ability to view ZIP files, to make self-

extracting archives, to select files from within the ZIP archive, and much more. Perhaps one of its most useful features to WordPerfect users is the ability to retrieve a file from within the ZIP archive into WordPerfect.  
Programmer: Robert S. King.

### **Currently under development:**

VARmint (scheduled for release in Winter 1991). The program requires Office 3.0 or later and its Macro Editor. VARmint is a Shell- and Editor-driven WordPerfect 5.1 macro programming aid. Features include quick pop-in of all programming codes, including easy input to predefined {CASE}, {IF}, and {VARIABLE} structures. A menu construction aid with cursor control code and placement calculation is included. Perhaps its greatest attraction is the ability to record macro codes/keystrokes in run-time WordPerfect for import in the Editor 3.+ . Programmers: Robert S. King and Diane Kistner.

### **Freeware macros/programs:**

Don't Ask: WP 5.1 macro to copy/move/del files without confirmation

ASCII: pop-up ASCII character chart for WordPerfect 5.1

Perfect Peeper: auto-detecting archive file viewer, macro for WordPerfect 5.1, supports ARC, ARJ, LZH, PAK, ZIP, ZOO
