Copyright 1991

Welcome to LCS , a user-friendly, enhanced lottery program which is
intended to assist the serious lottery player in choosing winning
combinations of numbers.

Disclaimer:

{PgDn} for more {Home} to continue ...

The 12 Number LCS Model uses combination theory to derive 20
sets (tickets) of numbers to be used in any pick 6 lottery. By
matching 3 or more numbers out of the 12, you can substantially
improve your odds of wining multiple times.

Simply enter your 12 most favourite numbers (in any order) in
the indicated cells. Page down to see the 20 tickets generated
for play. Press Alt-P to print the tickets.

To check your winning tickets, enter the week's winning numbers in
the indicated cells, and the number of wins will be calculated.
To see the specific matches, page down to the 20 tickets.

{PgDn} for more {Home} to continue ...

The Lotto Combination Selector economically combines the numbers
YOU choose, it does not select the numbers for you.

For help in selecting numbers, a random number generator is
included (Press F9 to generate a new number). A frequency
distribution graph showing trends in winning Lotto 6/49 numbers
can be viewed by pressing F10. The registered version of LOTTO
COMBINATION SELECTOR currently shows trends from June 1990 to
  6 November 91.

Winning numbers for each draw can be input in the frequency
distribution by pressing Alt-I.

Alt-H   These help screens.

Alt-P   Prints the combination tickets.

Alt-I   Input winning numbers.

Alt-U   Update frequency distribution with current
           winning numbers.
