Anytime you add a record to the Master File, the program will continue to present one data entry screen after the other. The only way it knows to stop asking for new records is if you leave the Primary ID blank. Conversely, if you fill in every field for one new record EXCEPT Primary ID, the program will ignore that record entirely.	0
-	0
You have the ability to search through the program for any 1st, 2nd, or 3rd ID, as well as by any word or phrase that you had entered into the comments field. This is true of the Master records and the Activity records also. You have an entire menu devoted to this one function: Search Through Service Call Data (option #2, Master File Menu).	0
