

Ivory Tower Software

Documentation for shareware **cBase™**, version 1.60
Updated July 25, 1993

"cBase" is a trademark of **Ivory Tower Software**
program and documentation copyright 1992, 1993, all rights reserved

cBase Installation

Copy CBASE.EXE, CPRODUCT.DAT, and CVENDOR.DAT to a directory on your hard drive. The dynamic link library VBRUN300.DLL should be in your \windows\system directory. You may obtain VBRUN300.DLL from the CompuServe WINSHARE forum library as VBRUN3.ZIP.

You may install *cBase* as an icon in your Program Manager in the usual manner.

How cBase Works

cBase reads the two data files into memory when the program loads. Changes are kept in memory and written to disk only on user command (File, Save). Now you can keep all your computer hardware and software vendor and product data in the same place. Track your registration, serial numbers, and upgrade status of all products.

Alternative data files may be used via the "Set Data Tables" command, but most users will probably not need this feature. Backup files (File, Save Backup) are saved to .BAK extensions.

If there are features you would like to see in future versions of this software, or if you find a bug or have any other comment, please contact me at the following address:

Ivory Tower Software
Richard Wagner
4319 W. 180th St.
Torrance, CA 90504

You may also send me a message via CompuServe (76427,2611). If you are

reporting a bug, please mention the version number.

cBase is shareware. That means that you can evaluate this program to see if it meets your needs before you purchase a license. You may also copy the program for distribution to others for their evaluations. To keep using *cBase* after your evaluation is complete you must purchase a user license. For a copy of the latest registered version and a single license to use the software on any machine, send \$35 to **Ivory Tower Software** at the above address. Site licenses are also available.

History

| Vers. | Date | Description |
|-------|-----------|--|
| 1.51 | 13-Dec-92 | The program which had been developed for the private use of Ivory Tower Software was adapted for publication as shareware. |
| 1.52 | 3-Jan-93 | The software was recompiled with Visual Basic version 2.0 for a smaller executable size and more efficient resource utilization. Color options were incorporated. |
| 1.53 | 13-Jan-93 | This version fixes the "Edit Vendor Cancel" bug, which appeared with version 1.51. Registration private keys, rather than a separate registered version, are incorporated with this version. |
| 1.54 | 18-Jan-93 | This version adds the "Edit, Address to Clipboard" menu option, which puts the current vendor address in the Windows clipboard, in mailing label format. |
| 1.57 | 22-May-93 | Speed buttons for adding products and vendors have been added, which supplement the menu commands. |
| 1.59 | 8-Jun-93 | The user interface was slightly compacted so as to fit on a VGA (640 x 480 pixels) screen. |
| 1.60 | 25-Jul-93 | Recompiled with version 3.0 of Visual Basic. |

Disclaimer: *cBase* is not warranted in any way. Neither **Ivory Tower Software**, nor its officers, shall be responsible for any loss resulting from the use of this software, or from the failure of this software to perform as expected. All rights reserved.
