The Latest Windows Files

The Latest OS/2 Files

About Windows OnLine™, (the BBS)

Modem Specials

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features,* such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware,** with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition
is published weekly courtesy of the
Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

Windows OnLine

MODEMS

If you haven't joined the 14.4 club yet, be sure and check out our great prices on US Robotics modems! The reliability, the speed, the difference is incredible!

WHERE IN THE WORLD???

Where do you get your issue of the **WinOnLine Review Shareware Edition**??? As a part of our circulation survey, we want to know!!! We distribute our magazines (the **WinOnLine Review,** too!) to a number of systems, and let it migrate from there. It's important to us that you see every issue of our magazines, so let us know what you think of WOLR and WOLRS and where you obtain your copy. Give us a call at 1-510-736-8343 (modem) and leave a message to the SYSOP or to Wolly. Tell your local SYSOP how much you enjoy the WinOnLine publications! You're important to us, and we want to be sure to keep them coming!

640x480x16 Colors

Both the WinOnLine Review and the WOLR Shareware Edition are created to be displayed with a screen resolution of 640x480x16 colors. The reason we do this is so that all Windows users can read our magazine. It also helps us to keep our file size down. You will find it of great benefit if you normally use a higher resolution on your system to reduce your resolution to the above when you read our magazine. If you use 1024x768x256 as I do, the graphics displayed of our magazines will not be nearly as sharp.

Lower your resolution and...

Enjoy the issue!
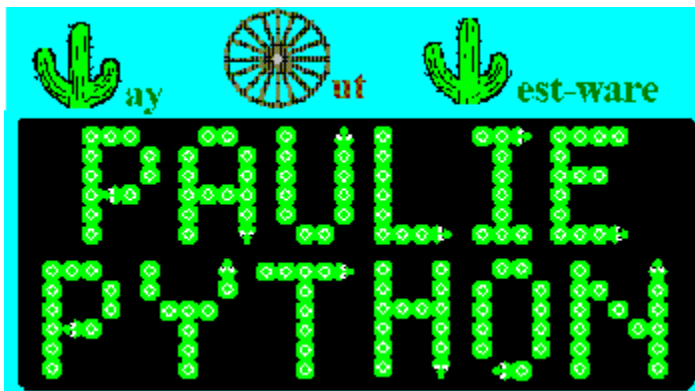

Wolly

SALVATION
from Progman & FileMgr

Wolly can't tell you everything there is to know about Salvation in this short format. Suffice it to say that it's a **program and file manager replacement** with many features you might find very handy. It can also act as your Windows **shell** if you wish. A single, but expandable file window subs for file manager, and prescribed sets of buttons (called button pages) with selectable icons and titles replace your program groups. A conversion program is included to install all your current groups as button pages within Salvation.

Some nice features include **security levels, a file finder, some nice disk and file utilities, deferred deletes**, and much, much more. In the brief time Wolly had to utilize Salvation he could judge it to be a credible manner in which to conduct Windows operations, though as with any change, it would take a bit of getting used to. **SALVT116.ZIP** (245K) is an interesting approach to Windows for a reasonable fee of **$20.00.**
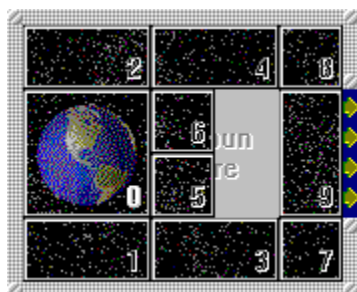

PAULIE PYTHON
A slithering good time

A cute Windows game. Paulie Python (no relation to Monty) crawls about **gobbling animals**

and avoid bloody collisions with obstacles. No, it's not brain surgery and requires little mental capacity, but then perhaps that's why Wolly liked it. Author Craig P. Thompson gives you two options to register Paulie: **$5.00** for the shareware versions as you see it, or **$14.95** for the "commercial" version. With it you can **design your own screens** as well as get more lives out of Paulie before he croaks from your incompetence. **PPYTHON.ZIP** (49K) can be some fun, and harkens back to before video games became more complicated than algebra.

SAVE THE EARTH
Sliding Block Puzzle

AAAAAHHHH! Remember those **sliding block puzzles** which drove you nuts? Now you have the same opportunity to be frustrated with your computer (that's rare, isn't it?). Slider lets you **move those pieces until your brain falls out** and you retire, sniveling, into a corner. Better yet, send **$1.00** to register **SLIDER10.ZIP** (110K) and check the box marked "Send solution sheet".
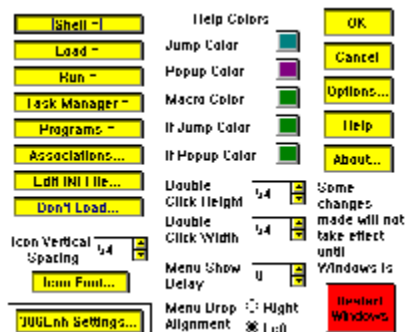

WINSNAP
Underdeveloped shareware

Win Snap's description sounds like if might be useful. It isn't, at least in its shareware form. It "snaps" a picture of your screen and allegedly will **create a BMP or DIB bitmap**. There are sizing options also, but are effective only when you snap your image. Neither of the above seemed to be enabled (sizing was "grayed out"). The help file tells you that if you register for **$10.00** your **WINSNAP1.ZIP** (341K) program will become completely operational. Nowhere does it tell you what doesn't work, intentionally or otherwise. Wolly **could not truly evaluate**

this program because it didn't seem to do much more than his Print Screen key. There's a self-timer option. That worked, but who cares? When a program is so crippled that you can't use enough of it to determine its usefulness, what's the point of distribution? The WannBe Software House won't be if it doesn't consider practicality of use as an encouragement to registration.

MORE CONTROL / ICON LIBRARY BUILDER
An old friend and a new one

More Control was a welcome freeware program that gave you access to easily make **changes to Windows features without getting your hands dirty with INI files**. A few more features have been added since it and Windows 3.1 came out, and it is now shareware with a registration fee of **$12.50***. **Associations, pop-up colors, icon fonts and spacing, double-click specifications**, these are but a few of the Windows convenience tweaks you can pull off from More Control. Proper installation of the program will conveniently place the icon within your Control Panel where it rightly belongs.

Icon Library Builder is also included in **MCICLB.ZIP** (166K) and is **a treat for the icon fans in the crowd**. Extract icons from DLLs, EXEs, ICOs and create ICL (icon iibrary) files of giant proportions. **Icons can be exported as BMPs** to be edited with Paintbrush and the like. The interface is very intuitive and operations are smooth. It is also priced at **$12.50***, but Sloop Software will register them ***both for $20.00**.

TRUE TYPE FONTS
Some, but slim pickin's this week

Avian   AVIAN.ZIP (66K)
includes regular, italic, bold, bold italic

Brush Hand   BRUSH.ZIP (39K)

Fritz Quadrata

FIRE EXIT
Parting is such sweet sorrow

Why is everyone is such a hurry to leave Windows? Why don't they just leave the normal way, you know --- with a GPF and a Ctrl-Alt-Del??? <G> Okay, so Wolly has had a rough week with *indelicately prepared* Windows shareware. Fire Exit did not toss Wolly out without his intentions, but gave him opportunities for a pure unencumbered exit or others, such a reboot, Windows restart, etc. A dialog can even show up to let to make your decision on the fly. **FIREXT10.ZIP** (24K) has a lot going for it except its registration. Wolly **headed for the nearest exit** as if his fur were on fire when he saw it priced at **$20.00**.

PYRAMID SOLITAIRE
Tut-Tut!

The card graphics are a bit rough, but this **freeware** program from James Waddell can give you a **good round of Pyramid Solitaire** if you like the game. This flavor of Solitaire presents you with a pyramid of cards which can only be cleared in pairs when they total 13. **WPYR.ZIP** (262K) contains a help file which provides the precise rules and the game will tell you if you're stuck if you ask. **Thanks, James, for your contribution!**

ALIENS
The game

You might remember a while back when we looked at the **Aliens Screen Saver** which promised this eventual game. The same cast of characters are back, performing for you in Aliens. No female heroine here to battle the unknown, just a somewhat **repetitive and kind of puzzling routine** of aliens descending from above trying to shoot you as you shoot them. The bearded author peers at you and encourages you to send him **$10.00** for **WALIENS1.ZIP** (38K).

DISK SPACE
A DiskSpace Cadet?

If you judge Windows users by the shareware population, they are apparently **preoccupied with disk space**, second only to leaving Windows. Disk Space is a respectable entry in the disk-watcher field, displaying   hard drive cleanly and clearly in the form of the graphic shown or in an icon form. You may **configure the drives** you wish to show as well as keep the icon atop any other competition on your screen. Registration is **$7.00** and will **bring you a second program called FloppySpace** which is not included in **DSW050.ZIP** (62K), designed to keep track of floppy drive space.

LENDER
Neither a borrower nor . . .

Lender joins the parade of Windows financial programs, albeit only on the borrowing side of the street. Essentially two options are offered: an **amortization** program which will provide calculation and printout, and a **loan calculation** program. Odd days (when your loan date is not the same as your payment date) is supported. **LTBWIN.ZIP** (28K) is nothing special to write home (or to you) about, and pales in comparison to many of the other, more fully featured financial programs we've seen written about in prior **WinOnLine publications**. What nails it is Lender's absurd **$47.00** registration cost and frequent nag screens. Wolly gives this one a "paws

down" and suggests you look at back issues of WOLR/WOLRS if you're in the market.

. . .

Wolly hates to be a nudge (alright, maybe he *likes* being a nudge), but authors, please don't cripple your software so it limps instead of runs. You may think you're *en*couraging registration, but you may, in fact, be *dis*couraging it!

Enjoy!

Evaluation Copy

WavSorter

Ver. 2.1   © 1993

Shepherd Software

Do you have a lot of WAV files? Are those sound files scattered all over your disk drive? Do you even know where they are? Have you ever wished you could collect all your sound files in one place? Wouldn't it be great to have an application know which directory your sound files are in? Wouldn't you like to play them at will, wherever they are? You may want to be able to move, copy, and delete them too. While we are at it, why not add drag and drop. Look no further. WaveSorter 2.1 is shareware that will help you organize all of your WAV sound files.

WavSorter is for managing WAV and MID sound files. In the evaluation copy, you can only manage WAV sound files. Features includes sorting, moving, copying, and deleting sound files. Drag and Drop functions are incorporated for dragging files from the file list to file folders. You designate a file folder with a given file directory. You assign the file folder a name you can recognize. All sound files in that directory are automatically included in the folder. The

idea is that each folder is a directory. Dragging and dropping files into the folder, it is like moving or copying the file into that directory. Once you have your folder build, you can play them individually or you play all the sound files in that folder.

Within WavSorter, you can reconfigure certain aspects of it. The Drag and Drop cursor can be changed from the default, a hand moving a file, to a dog, or spaceship, or anything you can create. Custom sounds for various functions can be assigned, such as the launching or message box.

There are more features than just playing the sound files. The Launch feature starts programs that are associated with that file extension. For example, you select a WAV file and then click on the Launch Button, the Wave Editor will be started, as long as the Wave Editor is associated with WAV extensions. The OpLight functions exactly like a status bar. It was designed to look and operate like a light. The OpLight will display what you are doing, such as moving files from one folder to another. This is where WavSorter will display an error, completion, or any message to be displayed to the user.

Another interesting "note" about WavSorter is that it supports CD-ROM's and they are treated just like a regular drive. You can copy sound files from your CD-ROM to folders. If you don't wish to copy them, you can listen to them. WavSorter is also compatible with Windows for Workgroups. WavSorter can even play during activation of your screen blanker. Now you can add background music, while you are prolonging your monitor's life.

WavSorter Pro 2.1 is basically identical to the shareware version. There are four major differences. The Pro version has the ability to play midi (MID) files, associating files using sound files other than WAV files, and support for unlimited number of WavSorter configurations. You can now assign WAV files to several Windows' system sounds.

The Bottom Line

For me, this is a very useful utility to have around. When I install a new application, which can do sound, it always leaves a trail of sound files. In the past, I would move them into one sub-directory. If you want control, you have to work at it. WavSorter makes my life a bit easier now. All I have to do is label and move them into a file folder. Now I know exactly where they are.

There were several things that made this application stand out. The Magic Target Help was something that just amazed me. It eliminates the paper manual all together. Point and click on the item, and you will get help. Animated icons caught my eye, such as the dog winking his eye, so watch for them. Another one was the status bar, that resembles a lighted sign.

If you are encountering an error message (ERROR 263) or something of that nature, please check to see if [MCI] Sound and [MCI] Sequencer drivers are installed. This is installed through the Control Panel Drivers Setting. Most systems with a sound card will have it installed already, if not, this driver may be needed.

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

The following directory contains all new DOS files to WOL

148.　DOS　　- NEW UPLOADS　　　　　　　　　　480　
67,688,012

(SubTotals)　　　　　　　　　17,186
1,879,677,163

Totals　　　　　　　26,511
2,919,330,626

This listing is as of March 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings
THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and **MORE FILES** - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:
