ABOUT THE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

WHATTA WEEK!

It wasn't a banner week for True Type fonts, but we had a bumper crop of new shareware! Wolly had a tough time boiling it down to ten programs to present to you in the Briefs, and there's some treasures there this week.

CANITBE?

Wolly sure is getting annoyed with boards (one, in particular) that find it necessary to add a FILE with a stupid name with a BBS advertisement to a zip file. Not only does it blow up the file, it distorts the last file date and makes you think you're getting a newer and perhaps different program. Are they taking credit for the file's existence or what? C'mon, use the comment feature within the zip, or buy ads like everybody else. Totally tasteless!

SHAREWARE BRIEFS

Wolly's Pick of the Week

SMARTCAT PLUS

A Smart Cat indeed!

And a **Top Cat** as well. This is a **strong application** that will **catalog your disk collections** every which way but loose, and with bells and whistles you'd never expect from such a program! You can even **catalog CD Roms or your hard drive** if you wish. Smart Cat Plus will read in the contents of your disks, including the files within ZIP, ARC, LZH, PAK and ARJ archives. **Add up to 240 byte comments** to any disk or file to describe the content. Simple and complex searches can be conducted for files, and and/or searches can be made of the descriptions. Maintain **separate catalogs** by category, for instance, a separate database for a large CD Rom, etc. But SmartCat Plus **much more than just a cataloger**.

Operations can be carried out on files from within Smart Cat, such as copying, moving, deleting, renaming, running (if it's executable), processing (if it's associated with a particular application), extracting it if archived, exploding it if it itself is an archive or printing it. **It will even call MacAfee's Virus Scan program** to do its thing before cataloging a disk. **User configurable buttons** are provided. *A feature on Wolly's wish-list with most disk catalogers is present:* it will **print lists and disk labels in predefined or user-designed formats!** There's so more that we don't have the space to describe here. Wolly was simply blown away by the **quality of this program**, which you'd expect to see on the shelf of your local OvumCranium store for maxi\$\$, rather than "on the boards." **SMTCAT15.ZIP** (339K)

registration is **\$43.95**, which includes **registration bonuses of a printed manual, catalog splitter, duplicate finder and export utilities, bonus DLLs to process graphic files**, and more. It's almost enough to encourage Wolly to get organized! (I said *almost*).

OIL BARON

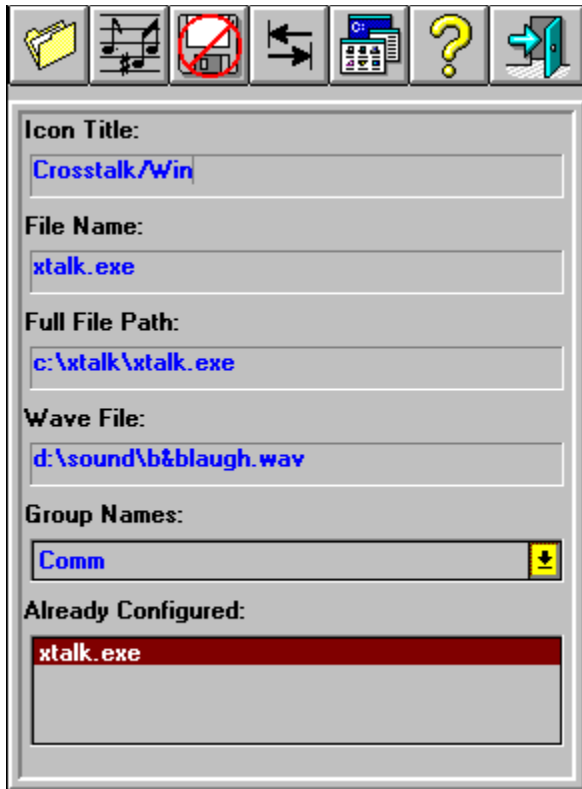

Monopoly for the Nineties

You won't find any street names from Atlantic City in this game. Just the cold, hard reality of money manipulation via the stock exchange. Oil Baron is a **game of strategy that can be played against the computer or another human player** (notice I said human, not humane). To play, you **create companies and trade their stock to accumulate as much wealth as possible**. Wolly let the program run by itself and watched in amazement as it performed financial manipulations and mergers to conquer his fictional opponent *Milky Miken*. No doubt if he'd played manually, Wolly would have otherwise lost his shirt (if he had been wearing one). **OILBRN12.ZIP** (93K) can be registered for **\$10.00**. No cute little red hotels included.

SURF'S UP

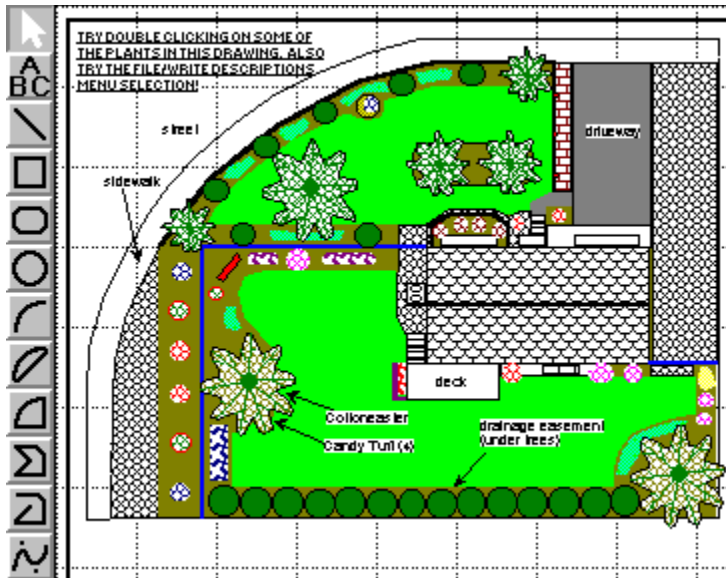

Dude, WAVs are back and better than ever

We looked at Surf's Up in issue #8 of the *WOLRS* and were impressed with its results but not with its ease of use. Author Zane Rathwick has gone to work and produced a **much easier way to cause WAV files to play as you launch programs** to annoy and entertain yourself and others around you. The dialog box provides **convenient selection of the program, sound file and Program Manager group** you want to bless with the noisy icon. You will still, however, need to go in and reselect the proper icon to replace the Surf's Up display. Users of shells that don't feed off Program Manager for its menus will have to go through some gyrations to use Surf's Up, but it's not brain surgery. *Price's Up* for [SURFSUP3.ZIP](#) (39K) to **\$15.00**. For progress we pay a price, which also brings some WAV files and the current version in return for registration.

KWIK DRAW

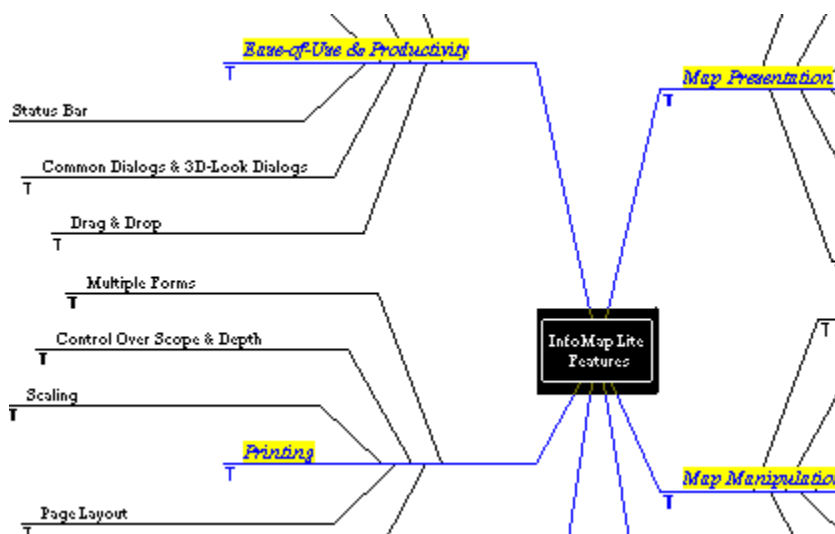

McGraw????

This drawing program is **object oriented**, unlike Windows Paintbrush and others. With KwikDraw you can take a drawn object and **continue to select and modify them** even after they have been placed in your drawing. In other programs that are not object oriented, the shapes are just part of the entire drawing and can no longer be worked on individually as with this type of program. Its versatility is so much greater. You are **not limited to the shapes provided; new combinations can be created and duplicated for reuse**. It is not a difficult program to get the hang of and **the help file is quite thorough and well organized**. The bulletin board version of KwikDraw, [KDRAW140.ZIP](#) (103K) is **freeware**, but it is restricted to the creation and manipulation of 32 objects. If this is sufficient for your simple needs, Merry Christmas! If not, and you like the feel of KwikDraw, the **"commercial" version is available by registering for \$40.95**, which includes further abilities.

INFO LITE

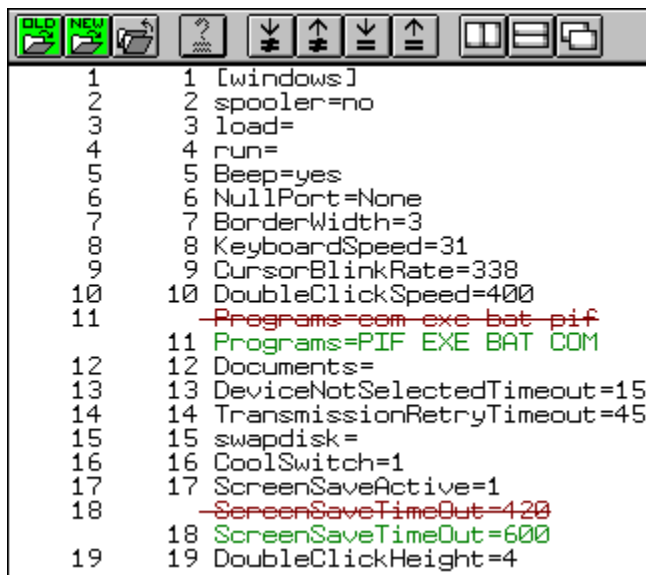

Actually, pretty heavy

This shareware program is a more limited version of a commercial product **designed to create "mind maps."** Essentially these are **a form of flowchart that interconnects different branches of concepts or ideas to a central hub.** Each branch can be developed to add additional pieces to the map, and notes can be attached. This is a pretty **extensive program with convenient pushbuttons** with descriptors of their functions. Maps are **easily created and have printing and abbreviated display options to consolidate information or visually communicate your ideas to third parties.** Wolly cannot attest to this type of thought or project organization (he prefers *MBC - Management By Chaos*), but you can take **IMLITE-1.ZIP** (244K) and **IMLITE-2.ZIP** (211K) for a test drive for a bit if you can tolerate the nag screens that seem to be triggered by certain activities. Registration for this UK-based product is **£40.**

This is a **great utility to compare two files and displaying their differences and similarities** in different formats. **Two files are specified and then analyzed** by Win Match. The results can be **displayed in separate windows in three different arrangements, or combined into one window as shown.** Lines are automatically numbered to ease the comparison. Handy pushbuttons control much of the action, jumping to and fro to locate matches and mismatches. Wolly's comparing his WIN.BAK and WIN.INI for gremlins in the illustration. There are **many uses** for **WINMAT10.ZIP** (130K), an **intelligently designed utility** that can be registered for **\$20.00.**

WIN FLY

Fly off into the Sunset

There are some businessmen Wolly knows who seem to *spend more time scheduling flights and traveling based on the frequent flyer miles they can accumulate than on their business*. Win Fly is for them. This basic **database program will help you keep track of your air miles** on American, Continental, Delta, TWA, USAir, and United. Data entry is easy and clean. **No output facilities are offered** in the way of printing or data, however, only the screen images. Neither was there any way to correct or delete entries made in error without killing all the records for that airline, though Wolly seems to think that the .DAT file can be manually altered, but that's cheating. **WINFLY.ZIP** (112K) can be registered for **\$12.00**. As we go to press Wolly notes a monster file that is a later and apparently heavier generation of Win Fly that may be worth a gander if you fly as often as they.

THE AZTEC CURSE

As a matter of fact, I *did* curse

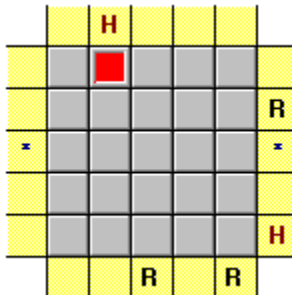

This game is a **variation on another well-established concept**: Hexagons with numbers at each side must be placed on a board so that the **adjacent numbers match**. These number patterns can be (must be) rotated to solve the puzzle, so things are **vastly more complicated**. One curse of this game is that it sucked the resources right out of Wolly's machine, from 62% to 17%-20%. Registration for **AZTEC.ZIP** (261K) is **\$10.00** that brings another game to you in

return as well as the solution to this one. It's a one-puzzle puzzle, which puzzles me.

BLACK BOX

Department of Redundancy Department

This black box contains **a game we've seen a few times before**. Targets are hidden in a user-sizable matrix. You fire "bullets" and receive feedback in the form of reflections, hits, or pass-throughs, from which you logically determine the location of the targets. This interesting exercise **B_BOX10.ZIP** is available for **\$5.00** from Creative Software Design, which apparently *isn't*, particularly, since it had to copy someone else's idea. But it is a good example of the genre.

Author Norman McCaffery offers his Message Machine for the computer as a **substitute for pink phone message syndrome**. Instead of putting poor penmanship to pink paper, you create a database of potential recipients. When you receive a call requiring their attention, you **enter the pertinent information** and Message Machine awaits their return. If they interrogate the program, they can **access the messages received and the program will dial** the number recorded on the message, but **only if the modem is on COM1 or COM2**. Wolly seriously questions the practical use of Message Machine in the real world, and in fact they could afford the \$10.00 registration for **MESSM15.ZIP** (68K) if they can only afford one computer. Won't somebody be using it when the phone rings?

by

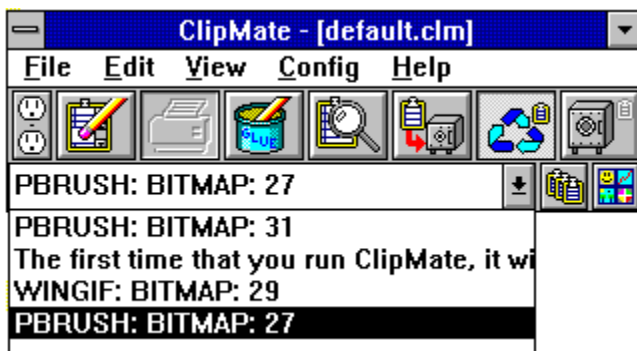

as told to Bob Gollihur

There I was winging merrily along cutting and pasting between two Windows applications, when all of a sudden I zipped when I should have zagged. Instead of hitting the **Paste** command, to replace some blocked text, I hit the **Cut** command for a second time in a row. Rather than depositing the desired text, I simply copied the new text right over the text I wanted to move and the text I wanted to move was gone to the bit bucket, never to be seen again. After a suitable flurry of monosyllabic and polysyllabic expletives, obscenities, and other well selected words that described my displeasure, I resigned myself to having to retype the text I had lost. Fortunately this exercise only took a few minutes, but it did convince me that I did need something to overcome the shortcomings of the Windows clipboard.

So, off I went, in search of the best clipboard manager I could find. Well after looking at a wide range of programs I've found the program that earns the coveted **Works For Me** award in the clipboard manager category. This program is *ClipMate 2.01*. Unlike several clipboard enhancement programs, the *ClipMate 2.01* program will handle both text and graphics, and handles both exceptionally well. Despite the power of this program, it is surprisingly easy to use. Should you run into a problem though, the program has one of the best help systems I've seen in any shareware product.

The program has quite an intuitive feel and, though it offers a wide range of choice, the

icons are reasonably easy to understand. As shown here, reading from the left the icons control the following features of the program: Power Paste, Delete, Print Text Item, Glue Text, Magnification, Copy to Safe List, Activate Recyclable List, and Activate Safe List. The small icons to the right of the Clip Item Selection List Box, below the main icon bar control the Multiple Selection List Dialog Box and the ThumbNail Select.

Power Paste. This option allows you to paste multiple items into an application, without going back to ClipMate to select the next item. You can select the order of pasting by clicking either the top or bottom socket. The top socket pastes in the UP direction (oldest to newest) and the bottom socket pastes in the DOWN direction (newest to oldest).

Delete. The delete button erases the Clip item or items selected from the Active List.

Print Text Item. This option prints the currently selected Clip Item or Items. This only works with text and not graphics.

Glue Text. This function allow you to combine or append selected text Clip Items into one single larger Clip Item. The resulting item is then copied back to the clipboard as a single item.

Magnification. This button opens or closes the magnification window. Opening the magnification window allows you to see the complete content of the Clip Item. If the item is text, the complete passage is shown in the magnification window.

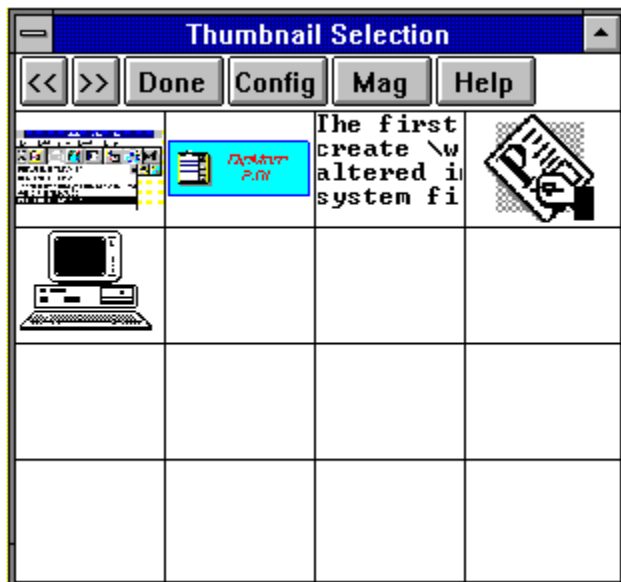

Copy to Safe List. The ClipMate program allows you to keep two different types of lists, the first is the **Recyclable List** and the second is the **Safe List**. The **Recyclable List** allows you to continue to add items to the list until you reach the user specified limit. Mine is set for 100 entries but you can set yours to what ever you'd like. Once the maximum number of entries is reached the oldest entry is then deleted. The **Safe List** on the other hand is not erased and will continue to grow. You'll need to manually prune this list from time to time. This list is well suited for boiler-plate text or other Clip Items you want to keep close at hand. Only one or the other of these lists can be active at one time.

Activate Recyclable List. This button switches you to the **Recyclable List** and makes this the Active List.

Activate Safe List. This button switches you to the **Safe List** and makes this the Active List.

Clip Item Selection List Box. The primary method for keeping track of the items in the Active list. This box shows the list of titles for each Clip Item.

Multiple Selection List Dialog Box. This option shows a dialog box that allows you to select multiple Clip Items at a time. Several operations, such as Delete, Print, Glue, and Copy to Safe List may take advantage of the multiple selection.

ThumbNail Select. This shows each entry as a small ThumbNail. Though most convenient for graphics, the thumbnails may also be used to show text. Once the desired ThumbNail is selected, it may be magnified for closer examination.

The **ClipMate 2.01** program is a remarkably sophisticated shareware program that has earned a spot on my computer. In fact, this is one program that will stay in my Utility Directory until my computer melts down. If you ever use the Windows clipboard to move text and graphics between your applications, this is one program that you should check out. Who knows, you might even start to like the clipboard. Members of Windows OnLine can find **ClipMate 2.01** as CLPMT201.ZIP in Directory #150 - (Windows- New Uploads).

This listing is as of June 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings
THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and MORE FILES - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:

Would You Like Your Program Included in Shareware Briefs??

Each week *Wolly* looks at programs which have been posted on **Windows OnLine™**. Perhaps your program can be included.

UPLOAD your creation to **Windows OnLine™** *immediately* upon availability. Call **510-736-8343**

You may leave a (C)omment to the Sysop; a menu will allow you to designate the recipient.

If you would like, you may send pertinent supplementary material such as press releases, registered copies and other information to:

Bob Gollhur, Editor

WinOnLine Review™ Shareware Edition

Seven Baywyn Drive, Ocean View, NJ 08230-1060

Mail early to be certain it will arrive during the same week you upload your program to Windows OnLine™.

Please be advised that submission is no guarantee of appearance or a favorable review from Wolly in the Shareware Briefs. However, all new Windows shareware will appear in the New Files column.
