Help Index F1 Opens this 4A Calculator help file

About 4A Calc... Ctrl+A Shows the About... box

4A Calc General Notes

Use either the keyboard or the mouse to enter numbers.

You can enter an almost unlimited number of digits. However, only 15 will display to the right of the decimal point.

Scientific notation will be used where necessary.

The Convert menu will only convert numbers from -2,147,483,648 to +2,147,483,647.

If the program does not register your keystrokes, use the mouse to click on a number. This will 'unstick' the application.
