

Sheet1

*--A MACRO MANAGER to activate any *.MLB library macro in the default directory
*--Use the /Range Name Label Right {End} {Down} <ENTER> to define the range names in this column (starts with the \Y name)
*--Place the cell pointer at upper left cell of the range to be processed
*--Hold the <ALT> key and press <Y> to activate the macro
*** See the README.PRN file for details ***
*** FOR VERSION 2.2/2.3/2.4 ***
