Extra Buttons

This format with extra buttons saves a lot of menu clicking. The project file also contains a macro to size the window.

About this Help file

This Help file was created from a Word for Windows document using a macro written by Roger Hadgraft. Any reasonable Word file can be translated into a Windows Help file (with the aid of the Help Compiler of course). The macro is available as drhelpe4.zip on ftp.cica.indiana.edu (in subdirectory pub/pc/win3/winword, or possibly still in pub/pc/win3/uploads), and a registered version (US$20) is available by contacting roger.hadgraft@eng.monash.edu.au.
