About this Help file

This Help file was created from a Word for Windows document using a macro written by Roger Hadgraft. Any reasonable Word file can be translated into a Windows Help file (with the aid of the Help Compiler of course). The macro is available as **drhelpe4.zip** on **ftp.cica.indiana.edu** (in subdirectory **pub/pc/win3/winword**, or possibly still in **pub/pc/win3/uploads**), and a registered version (US$20) is available by contacting **roger.hadgraft@eng.monash.edu.au**.

Opening Screen

In this space you could put the name of the Help file and your name. It could be one of these wonderful advertising screens.
