Concurrence 1.0
Outlining and Presentation

Brought to you by Lighthouse Design, Ltd, the creators of Diagram!, Concurrence is the first integrated outlining and presentation software available for the NeXT platform.   Concurrence takes full advantage of NeXT's multimedia capabilities and allows users to create high-quality on-screen presentations complete with sound recordings and file links, or output to any PostScript output device, from printers to 35mm slide makers.

With a built-in outliner that goes feature-for-feature with most word processors, Concurrence is made for creating and maintaining structure, from documents such as legal briefs and discussion agendas, down to simple to-do lists. Rearranging topics is a simple as picking them up and dragging them around the screen. In addition, Concurrence's outliner features rapid collapse and expand topics, auto-

labelling, level formatting, and EMACS key bindings.

Using the audio capabilities built into every NeXT computer, Concurrence supports the desktop-based creation of on-screen presentations with voice and sound accompaniment. In addition, Concurrence supports the "drag and drop" incorporation of any encapsulated PostScript (EPS) or tagged image file format (TIFF) image.   For screen-based presentations, Concurrence features a wide variety of PostScript slide transitions such as dissolves, wipes and scrolls. Slide sorting can be done on a slide-by-slide basis, or entire modules of slides may be moved together for more rapid sorting than conventional "light table"-type sorters allow. Applying styles to large presentations is simplified by using master slides for each presentation view. Users may create an unlimited number of master slides.

Concurrence easily maintains multiple presentations and outlines as views within the same document so that changes made to one presentation or outline are automatically propagated to all other views of the document.

Concurrence's "Prepare for Mail" feature allows users to assemble self-contained presentations and distribute them via NeXT Mail to NeXT users running Concurrence anywhere in the world.   In addition, users can create auto-repeating on-screen presentations for applications such as conferences and information

centers.

Concurrence is currently shipping and available. For price information contact NeXT Connection at (800)800-NEXT or +1-603-446-3383. Concurrence requires NeXT STEP 2.0 or later. Academic discounts are available to qualified individuals and institutions. Companies and institutions interested in site licenses should contact Lighthouse Design directly at +1-301-907-4621.
