Installation Options
(NeXT System 2 & System 3)

Currently there is only one install option:

1. The *Install NXFax Monitor in* button determines the location where the NXFax Monitor application will be placed. The default location is in the /LocalApps directory on the machine where NXFax is being installed. Press this button to select another location.

    For more information on NXFax Monitor features refer to the Monitor's help panel after installation.
