Part 3

Command Reference

The Command Reference chapters serve as an encyclopedia of the commands in Concurrence. Each chapter covers a different menu, and details each command found there.

In the headings in this section, the name of a command is often followed by a character in parentheses—the command's keyboard alternative*. Holding down the Command key and typing the keyboard alternative is the same as choosing the command from its menu.*

Please note that some standard commands and menus, such as the Hide and Quit commands, or the Windows and Services menus, are not documented here. For help with these commands and menus, refer to the NEXTSTEP User's Guide.

Part 3

Command Reference

Chapter 16
Info

Info Panel	181
License	181
Manual	182
Samples	182
Suggestion	183
Preferences	184

Chapter 17
Document
