Path: /NEBULA/Documents/Diagram

Disk Space: 1.11 MegaBytes

Description: These files are to be used in Diagram!
by LightHouse Design.

paste.tiff ↵

24C.diagram A sample of a battery part catalog

Accident.diagram A diagram of a road accident

Alternator.diagram How to test your alternator

Batteryd1.diagram The Charge-Discharge Process

Battery2.diagram The flow of Electric Current in the C/D Process

This is a collection of symbols for drawing Feynman Diagrams
and other pictures of use in High Energy Physics with Diagram!

Feynman:

Decays.diagram

HEPhysics.dpalette

Mesons.diagram

PhiPiPhieNu.diagram

SpectatorSL.eps

StandardModel.diagram

BunchOPalettes

by Roger Rosner

Useful Diagram! documents and palettes, including a much-needed palette for drawing circuits and a comprehensive set of network design palettes. Can be used with all releases of Diagram!.

University of Waterloo Diagram Palette Collection
by Kevin Brain, Ksenia Switalski, Dathan Liblik
Backgrounds - Cool things to throw behind any diagram!
BkgndsRandom - never the same twice!

ColorGradations - overcome one of the limitations of Diagram!

Components - electrical symbols

Gears - a few "teethed-things"

Gradations - (gray scale) overcome one of the limitations of Diagram!

LogicGates - Logic symbols

Math - a rather kludgy way to do equation editing (mostly various symbols from the Symbol font)

PCBLayout - cheap and dirty printed circuit board layout

PCBLayoutPadSizes.diagram - (not a palette) dimensions of objects contained in PCB layout palette (for those who would want to know)

PSTidBits - little bits and tids

Stars - "It's full of stars!"

Tiles - non-ceramic (interesting as borders)

Triangles - stroked and unstroked

3-DShapes - Add a new dimension to your diagrams...

UW_Palettes_eps/ - source postscript files of all the objects
