Release Notes
SoftPC 4.10 for NEXTSTEP/Intel Maintenance Release

This new SoftPC 4.10 for NEXTSTEP/Intel CD-ROM release includes software fixes and enhancements which are listed below.

SoftPC 4.10 for NEXTSTEP/Intel fixes and enhancements:

·   WINSOCK fix to properly support IP addresses
·   Support for NeXT MS-DOS partitions on physical drives larger than 504MB
·   8-bit video color is now supported
·   SmartCopy has been enhanced to provide bi-directional copying of both text, and bitmaps graphics.
·   SoftPC now properly closes when NEXTSTEP sends it the CLOSE application command
·   SoftPC now gracefully handles access to NFS file systems that were exported as R/O but mounted as R/W
·   Error handling on floppy drives has been modified.
·   Improved behaviour in full screen mode.
·   Improved behaviour in Windows DOS Boxes.
·   Error handling on floppy drives has been modified.
·   An unsupported Windows Sound Driver is now available.

This product is designed for use with NeXTStep3.3 for Intel Processors.   It is particularly recommended that serial drivers v3.3.2 or greater be installed, and that the latest release of the Interceptor library be used.
