

Household Register for Windows

Welcome to Household Register for Windows v5.10. The document will provide a brief description of the program, system requirements, installation instructions, registration information, author contact information and product history.

Program Description

Household Register for Windows is a full featured program that can organize and manage a detailed list of everything you own. It's ideal for both home and office. The program automatically categories, each entry by category, location and owner. You can customize the category, location and owner lookup lists to fit your exact need.

The program tracks item, location, owner, category, serial#, model#, description, purchase/replace price, warranty information, extended warranty information, appraisal information and a 32,000 character memo field. Some program features are outlined below:

Enhanced Browse Window

Resizable and can quickly display your data sorted five different ways. Press a button to display in reverse sort order. Warranty status of items are identified by color coding. Non-warranty items are black. Items with 30 or more days remaining displayed in green. Items with 1-29 days are blue. Expired warranty items are red.

VCR type controls for quick program navigation. Features incremental searching. Mark, Unmark items for printing or deleting.

Query Wizard

The query wizard allows you to quickly create and save your own queries in plain English.

The Query Wizard interface is very easy-to-use and guides you through building the query step-by-step.

Use the queries to view the data in the browse window or to print a report. Just print or view the item or items desired.

Can save, recall and modify previously saved queries.

Enhanced Report Module

(1) Viewing - single page or 2,4,6 thumbnails with fully scrollable zoom from 25% to 500%. (2)Paging - First/Last/Next/Pre, jump to page. Mark pages for printing or deleting. (3)Text Search - options include "match case", "whole word only". Can mark matched pages for printing with option to delete unmarked pages. (4)Destination - screen, printer, or file. Reports can be archived for later use. Saved reports saved with description and date/time stamp. Can be reloaded, previewed and printed. (5)Printing - Single or multiple copies. Collation of copies. Reverse page printing for inkjet printing. Standard, 2up and 4up printing (multiple pages per standard page). Duplex printing for printers that do and do NOT support duplex printing.

Backup and Restore Module

Can backup up your data files to floppies using compression, can span multiple floppy disks if needed. Restore returns the data from your floppies to the hard drive.

Import/Export

Can import and export data in dBase and ASCII format. Can import data from earlier version of Household Register for Windows or any program that stores or can export files in dBase (DBF) format or ASCII format. Cannot import data from Household Register for DOS -- but we do provide a conversion program to registered users that will allow import of the data.

Report Writer

Allows you to create store and recall user definable reports. Select fields, totals, sort orders, breaks, filters and more.

Can import data from earlier versions of Household Register for Windows. A conversion program is provided to registered users to convert Household Register for Dos data for use with this program.

Systems Requirements

- * Microsoft Windows 3.1, Windows 95 or Windows NT
- * IBM-PC or compatible with a 386 or greater CPU
- * 4MB Ram (8 recommended) and approximately 3 meg free hard disk space
