I.S. User Information for Windows95 Overview

I.S. User Information was created out of need for a SOLID system administration tool for tracking user information such as hardware, operating system, passwords, phone extensions, network shells, etc. I have made it very flexible with several "USER DEFINABLE" fields.

I can be reached at **franklin@lynx.csn.net**

To register this program or find a recent release visit my web site at:

http://www.csn.net/~franklin/user_info.html

This is version 2.09 released September 30, 1996.

With registration you will receive a code to disable all NAG screens and allow you to use the program past the 30 day evaluation period.

Registration of I.S. User Information :

Single user license $50.00
5 User license $100.00
Unlimited User License $200.00

Registrations should be sent to :

Jason Franklin
10303 E. Peakview Ave #102
Englewood CO 80111

Getting Started

If you are upgrading from 2.08 then you should back up your databases prior to installing upgrade. If you install to the new default directory then you will have to copy your old databases to the new install directory manually. The syntax should be something like "copy c:\userinfo\userinfo.? c:\program files\i.s. user information"

I.S. User Information can be installed in any directory you see fit.
You can have the user data base reside on any physical drive or network drive
You can have multiple administrators share the same data base
You can have multiple instances of I.S. User Information running concurrently

**The first time you start I.S. User Information
You will use the default password USERINFO**

Command Line Syntax

If you have multiple databases you wish to use you can automatically start which ever database you wish to use the syntax is :

"C:\USERINFO\USER INFORMATION.EXE DATABASE.MDB"

Through the use of this command line you can create multiple icons for different companies and have them all running at the same time in one windows session.

Make sure the "Start in directory" is set properly. This should be the directory where I.S. User Information is installed in.

Print Menu

Network List
Prints a list of common network fields for all records

Phone List
Prints a list of Name Phone/EXT   Location

TCP/IP Addresses
Prints a list of all active TCP/IP Addresses

Printer Setup
Calls windows printer setup dialog box

User Name Field

Holds users full name.

Note:
For searching porpoises it is usually best to enter the name LASTNAME   FIRSTNAME.

Type   -   Text
Length   -   50

Example:
Franklin Jason

 Extension/Phone Field

Holds users extension or phone number.

Type   -   Text
Length   -   30

Example1:
434

Example2:
770-555-1234

Location Field

Holds users geographic location.

Note:
This field can also be useful for separating departments.

Type   -   Text
Length   -   50

Example1:
Atlanta, GA

Example2:
Atlanta, GA - Accounting Dept.

 LAN Login Field

Holds users LAN Login ID.

Note:
Lot's of system administrators use the users initials for this field. The idea is it increases
system security.

Type - *Text*
Length - *50*

Example1:
jason

Example2:
JBF

 LAN Password Field

Holds users LAN Password.

Note:
This field will not be displayed unless you toggle the SHOW PASSWORD button, all you will see are "*****".

Type   -   Text
Length   -   30

Example1:
pass

NIC Address Field

Holds users NIC Address. (Network Interface Card Address)

Type   -   Text
Length   -   30

Example1:
608CE84A59

UNIX Login Field

Holds users UNIX Login ID.

Note:
Usually users sir name. And almost always lower case.

Type   -   Text
Length   -   20

Example1:
franklin

 UNIX Password Field

Holds users UNIX Password.

Note:
This field will not be displayed unless you toggle the SHOW PASSWORD button, all you will see are "*****".

Type   -   Text
Length   -   30

Example1:
password

 TCP/IP Field

Holds users TCP/IP Address. (Transmission Control Protocol / Internet Protocol)

Type   -   Text
Length   -   40

Example1:
192.231.189.6

TTY Field

Holds users TTY Address.

Type   -   Text
Length   -   40

Example1:
35

Example2
Physudieo

Port Field

Holds users physical Port Address.

Type   -   Text
Length   -   50

Example1:
26

Example2
00-08-03-01

 Task Button

Clicking this to bring up a Task List, like a To Do list. Here you can cut and past to move certain jobs forward and backwards.

A must have for any system administrator.

 Computer Button

Clicking this will display a screen linked to the current user where you can enter information about the users hardware.

 Phone Button

Clicking this will toggle you between viewing/editing phone fields and normal display screen.

 Note Button

Clicking this will toggle you between viewing/editing note fields and normal display screen.

 Show Password Button

Clicking this will toggle you between viewing/scrambling password fields.

 First Record Button

Clicking this move you to the first record in the database.

 Last Record Button

Clicking this move you to the last record in the database.

 Previous Record Button

Clicking this move you to the previous record in the database.

 Next Record Button

Clicking this move you to the next record in the database.

 Add Record Button

Clicking this add a record to the database.

Del Record Button

Click this to delete the current record from the database.

 Quick View Button

Click this to view a spreadsheet like view of the current database.

 Search Button

Search User Name

Jason B. Franklin

Select User Name

- ◉ User Name
- ○ LAN Login
- ○ Unix Login
- ○ TCP/IP
- ○ TTY
- ○ PORT

[OK]

Click this to search the current database.
