

## What's New for My Life

Copyright © 1993-1996 JRE Enterprises, All Rights Reserved

### *WHAT's NEW V3.4*

**Corrected** SETUP program.

**Removed** "nag" screens.

### *WHAT's NEW V3.3*

**Corrected** various minor bugs.

**Improved** SETUP process, Setup program no longer needs to be run after unzipping the files. Setup works better in Windows 95.

### *WHAT's NEW V3.2*

**Corrected** error code 3022, "Can't have duplicate key..." errors, which were due to improper handling of international date formats.

**Added** ability to pay via credit card (Master Card or Visa). Credit card orders will be processed through JRE Enterprises' publisher, Famsoft Inc.

### *WHAT's NEW V3.0*

**Added** print preview capability.

**Added** undo capability. Up to the last ten user actions can be undone.

**Added** ability to turn the visibility of scrollbars on and off.

**Created** a separate registration program for entering registration information. Removed the capability from the My Life main program.

### *WHAT's NEW V2.9*

**Corrected** invalid error lines and error codes being displayed in certain error messages.

### *WHAT's NEW V2.8*

**Corrected** "Invalid year entered" error which would occur when changing the year in the YEAR's BEST or YEAR's WORST scrapbook. This error would occur even if the year entered was a valid year.

### *WHAT's NEW V2.7*

**Corrected** "error=0 at line 40008" during database conversion from My Diary Version 1.x to My Life version 2.5+.

### *WHAT's NEW V2.6*

**Added** ability to enter a date via a text box to set the calendar.

**Added** ability to delete diary entries.

**Corrected** error code = 3134, Syntax error in INSERT statement. This error would occur when doing a Find Diaries using a keyword.

### *WHAT's NEW V2.5*

**Added** Spell Check and Thesaurus to My Life.

**Added** ability to specify whether to print diaries in ascending or descending date order.

**Added** ability to specify whether to print multiple diaries per page.

**Added** ability to specify whether to print multiple letters per page.

**Improved** the HELP text.

### *WHAT's NEW V2.4*

**Enhanced** the "Import File" and "Export File" dialog boxes. These dialogue boxes will now retain the last drive:\directory and file format specified.

**Corrected** handling of non-HED files as HED files when importing and exporting files.

**Added** ability to specify page range and number of copies when printing.

*WHAT's NEW V2.3*

**Corrected** improper display of "No Default Printer ..." when a default printer is present.

*WHAT's NEW V2.2*

**Corrected** MYMAINT.EXE displaying "Unregistered Shareware" messages for registered users.

**Corrected** various SETUP program bugs.

**Included** additional vendor and ASP files.

**Provided** bypass to mouse cursor sticking to edge of screen. See INSTALL.WRI, Known Problems section for problem bypass information.

*WHAT's NEW V2.1*

**Changed** name from MY DIARY to MY LIFE.

**Added** ability to store BMP, GIF, PCX, and TGA picture formats in the picture scrapbook. Any previously saved ICO, WMF, or DIB images will be lost. Previously save BMP images will be retained.

**Added** 'Save As' capability to letters.

**Added** ability to change the My Life database description.

**Added** ability to toggle the display of the Tool Bar off and on from the Letter and Diary menu, (View menu item, Tool Bar sub-menu item). When toggled off, more screen space is available for editing letters and diaries.

**Added** ability to sort table data any column and in ascending or descending sequence.

REFRESH button added to redisplay the table data in the new sort order.

**Added** the display of the My Life Database filenames to the 'Open My Life' window.

**Added** a 'Are you sure you want to delete ...?' prompt on a delete of a letter.

**Changed** all tables highlight the selected cell, instead of putting a dotted-line around the cell.

**Modified** My Life to follow the Association of Shareware Professionals (ASP) software guidelines for shareware. JRE Enterprises is now a member of ASP. Changes to the unregistered version of My Life are:

My Life will no longer quit working after 60 days.

My Life will display "Unregistered Shareware" messages.

My Life will print "(Unregistered Shareware)" as a footnote.

**Modified** My Life to automatically display the 'Open My Life' window if My Life Databases exist or the "Create My Life Database" if no My Life Databases exist.

**Modified** the way My Life handles corrupted databases. Now you will be automatically prompted to do a repair from My Life without having to go to the My Life Maintenance program.

**Corrected** 'Error Code = 3197, Data has changed' bug. This correction required a database change, which will be done automatically for existing My Life Databases.

*WHAT's NEW V2.0:*

**Added** ability to insert pictures into diary and letter documents.

**Added** ability to import and insert ASCII and RTF 1 files into diary and letter documents.

**Added** ability to cancel printing of diaries, letters, and reports.

**Added** ability to specify paragraph formats in diary and letter documents.

**Added** ability to specify whether to print "No Records Found" or nothing when printing or print viewing reports that have no data.

**Added** ability to specify whether to print a title, a cover page, or both when printing letter reports and diary reports.

**Corrected** 'Error Code = 3075' bug. This bug would occur with some international date settings.  
**Corrected** 'Error Code = 14' bug. This bug would occur on extremely large diary or letter documents.

**Significantly reduced** program size of My Diary.

*WHAT's NEW V1.3:*

**Added** ability to find diaries and letters by specifying search conditions on the 'creation date', 'last modification date', and by specifying keywords that will be searched for in diaries and letters.

*WHAT's NEW V1.2:*

**Modified** the diary and letter menus. The menus are now more like menus found in major word-processors, with many of the same short-cut keys supported.

*WHAT's NEW V1.1:*

**Various** documentation changes.
