

## Bullsy Ver 2.71828

This file contains:

- Hardware Requirments
- Installation Guide
- Distribution
- How to Contact us

### Hardware Requirements

All you need in order to play bullsy, is windows 3.1 or higher (ie win95,win 3.11) .

Any computer capable of loading windows,will play bullsy just fine (we hope!)

### Installation Guide

Well,to install Bullsy, all you have to do is copy all the files into a directory, and then choose File|New (from windows main menu) and make a new item, then type the directory and file name of bullsy (ie c:\windows\games\bullsy\bullsy.exe).

that's it.You're ready to play!

### Distribution

You have the right to use, copy and distribute this program provided that no charge other than for handling costs is made.

Also, you can distribute Bullsy freely, but as the whole package.

Do not change any of these files:

- Bullsy.exe
- Bullsy.hlp
- Readme.txt
- Readme.wri
