

## **Fallback procedures for JRE Home Inventory Version 6+**

If you have problems with JRE Home Inventory Version 6+ and would like to return to using a version **prior to Version 4**, use the following procedure:

1. Rename all \*1.OBF files to \*.DBF. Example: Rename JREICAT1.OBF to JREICAT.DBF
2. Delete all \*4.DBF, \*4.MDX, and \*4.DBT files. Example: Delete JREICAT4.DBF
3. Re-install the prior version of JRE Home Inventory.

**NOTE:** All changes to data made under Version 4+ will be lost.

If you have problems with JRE Home Inventory Version 6+ and would like to return to using **Version 4.x**, use the following procedure:

1. Rename all \*4.OBF files to \*4.DBF. Example: Rename JREICAT4.OBF to JREICAT4.DBF
2. Rename all \*4.OBT files to \*4.DBT. Example: Rename JREPROP4.OBT to JREPROP4.DBT
3. Delete all \*5.DBF, \*5.MDX, and \*5.DBT files. Example: Delete JREICAT5.DBF
4. Re-install the prior version of JRE Home Inventory.

**NOTE:** All changes to data made under Version 6+ will be lost.
