January 25, 1992

Dear Over_LAZ User:

This little memo is to acquaint you with some of the features of
Over_LAZ PS that you may find useful and interesting in your
everyday life. Over_LAZ PS are printer command files used with
WordPerfect 5.0 or later and a PostScript compatible printer to
automatically print letterheads, 'rubber stamps' and decorative
borders. Although you cannot see anything unusual when you look
at this document on a screen, even in printer preview mode, wait
until you print it out!

Before printing this document, make sure you have copied the
files IOMEMO2.PS, ONE.PS, and NEWS.PS to your WordPerfect
'downloadable fonts' directory. For complete instructions, see
the OVER-PS.DOC file.

Over_LAZ PS will only work with PostScript compatible printers.
It will not work with dot matrix or other printer types. A
version of Over_LAZ is also available for HP LaserJet compatible
printers. Look for the file OVER1A.ZIP on your favorite BBS.

Sincerely,

Herne Data Systems Ltd.

p.s. Be sure to read all about our FREE customized letterhead
offer on page 3 of the OVER-PS.DOC file.
