Features and Benefits Summary

Remotely Possible/32 Lite was designed to meet your BASIC Remote Control needs. However, for the first 30 days after the date of installation you will be able to experience full product functionality. After your 30 day preview has expired the following product

areas will remain functional:

General Features	Remotely Possible/32 Lite	Remotely Possible/32 (Full Version)
Remote Control	Yes	Yes
File Transfer	No	Yes
Chat	No	Yes
Security	Yes	Yes
User Preferences	Limited	Yes
Data Compression and Error Correction	Yes	Yes
Address Book	No	Yes
Browse Network	No	Yes
On-line Help	Yes	Yes
Multi-Viewer	No	Yes
Multi-Host	No	Yes
Technical Support	No	Yes

File Transfer Benefits

File transfer is a powerful utility that lets you exchange files, delete and rename files, and create and remove directories between two Windows PCs.

Chat Benefits

A useful two-way interactive keyboard communication session between two Windows PCs.

Security Benefits

Protect your computer from unauthorized users or intruders with Remotely Possible's built in security system.

User Preferences Benefits

Change user preferences to customize each copy of Remotely Possible/32 to meet your specific needs.

Address Book Benefits

The Address Book allows you to organize and enter the names and connection information for the users you frequently call.

Browse Network

The Browse Network feature allows you to scan selected networks for other PCs running Remotely Possible that are "Listening/Waiting for a call" and displays a list to choose from.

Multi-Viewer Benefits

Connect to more than one remote PC using remote control, file transfer and chat using any supported protocol.

Multi-Host Benefits

A single PC can have several Viewers connected to establish an interactive and/or demonstrative training environment.

Technical Support Benefits

Free, unlimited technical support is available Monday to Friday from 8:30am to 6:30pm EST.

Remotely Possible/32 is Ideal for…

Remotely Possible/32 will deliver outstanding performance in many environments and has a model to match your needs.   Here are some ways to put Remotely Possible/32 to work for you.

- **Telecommuters and home office workers** can have the freedom to be at the office… even when they can't be.   Take control of your office PC by calling in via modem, RAS, SLIP or PPP.   Use remote control to access programs on your office PC or company network, download or upload project files and proposals with Remotely Possible/32's fast file transfer protocol, use keyboard chat to communicate with a coworker.
- **LAN Administrators, Customer Support and Help Desk professionals** can support end users right from their desk.   This saves time and money and provides the end user with fast, quality support.   Use remote control to help diagnose problems or walkthru a solution, transfer files to provide patches or upgrades, or chat to have a two-way communication session.
- **Trainers and students** can enjoy on-line interactive demonstrations, classroom training and passive monitoring.   Trainers can demonstrate applications while two or more users observe.   The Trainer can also allow specific user participation.   After explaining a particular program module, trainers can then observe students and assist them as they practice.
- **Web surfers** can tap the power of the internet by connecting using TCP/IP to any PC in the world running Remotely Possible.
