

Site-Licensing Information

Site-licenses can be obtained for 5 or more users of VAR Grade. The license allows internal use and copying of the software for as many sites / computers / users as contracted for. The site license includes the latest version of both the MS DOS program (**VAR Grade**), and the Windows program (**VAR Grade for Windows**). Unless otherwise requested, they are sent on 3 1/2" HD disks and include one printed manual for each version. Future updates can be obtained at 50% of the current site-license fee.

You can "upgrade" the license to include more users at any time by paying the difference in price from what you originally paid and what the price is for the higher number of users. For example, if you purchase a site license for 10 to 19 users, then decide to upgrade it to 20 to 39 users, you would pay an additional \$105. Prices are valid until a new version is released.
