

Chip Chewer!

Chip Chewer is a classic "eat the dots" maze game made with Klik & Play, the revolutionary instant game creator.

Objective:

Try to eat all of the chips in each level. Be careful that the Skullys don't eat you first!

Instructions:

At the beginning of each level, you (Chippy) will be in a safe area. Use the cursor keys to move Chippy around the mazes.

After Chippy eats all of the chips on each level, the next level will start.

You start the game with three lives. If a Skully collides with Chippy, you will lose a life. Look for life-adding "power ups" that appear on some levels.

If Chippy eats a Strawberry, Chippy will become invincible for a few seconds. Chippy can eat the Skullys to get extra points. Chippy cannot eat chips while invincible.

Have fun and go for a high score!

Information:

Klik & Play is a revolutionary new concept - an instant game creator. In minutes, you can design and create your own computer games from arcade, to strategy, to puzzle games and more. Easy enough for anyone to enjoy, there's no programming skill required - just "Klik & Play."

- * No programming skills required - everything can be done with your mouse
- * Hundreds of sounds, music samples and graphics
