[About Shareware](#)
[Why Register?](#)

About Shareware

This software is NOT free. It is copyrighted material; however, it is distributed as shareware. As such, the UNREGISTERED SHAREWARE version may be freely copied and distributed.

Contrary to popular belief, shareware is a kind of marketing -- not a kind of software. The only conceptual difference between commercial software and shareware is that with shareware you are allowed to try the software, for a limited period, before you buy it.

When you install Executive Desk for the first time, you are automatically granted a 30-day evaluation period, during which to determine if Executive Desk is of value to you.

At the end of the evaluation period, if you continue to use Executive Desk, you MUST register it. Failure to do so is in violation of copyright law and international treaties.

[Why Register?](#)

Why Register?

There are lots of great reasons to register shareware. Here are just a few reasons for registering Executive Desk:

Reason No. 1 (Registration is Easy and Fast):

Advanced activation code technology now makes instant registrations possible. With a VISA or MASTERCARD and a quick, toll-free call you can transform your current UNREGISTERED SHAREWARE version of Executive Desk into the full-featured registered version in seconds. If you don't have a major credit card, simply drop an e-mail line to us and you will receive your activation code in a flash (usually 24 hours). If all else fails, fill out the registration form and send it with cheque, money order or credit card information via MAIL .

Reason No. 2 (Additional Features):

Let us say, first of all, that the unregistered shareware version of Executive Desk is a fully-functioning and unrestricted product. It is not crippled in any way. That said, when you register Executive Desk you get some extra functionality. Here are a few.

-XBRIDGE to synchronize two user areas of EDESK:- This is a utility program provided to the registered users. XBRIDGE is a useful feature for people to synchronize their EDESK at Home with the one in the Office and vice versa. It is also useful for Boss-Secretary data synchronization. While secretary can manage the schedules and enter the notes, memos and updates, the Boss can simply sync with her area to update his own. XBRIDGE also allows a fast mode backup that takes only a few seconds to backup.

-DBF2ABK for Address Import: This is another utility provided to registered users to import Address/Contact information from DBF and Comma Delimited ASCII files into the Address Book.

-Splash screen disabling: The unregistered version is not restricted; however, the opening splash screens (or dialogs) can be a bit annoying after a time. Registering allows you to turn off splash screens so Executive Desk can load faster. This is particularly good if you prefer to load Executive Desk at startup.

-Latest Update : Dont worry if you dont have the latest version of EXECUTIVE DESK. Upon registration, you will receive the latest update containing any newly added features.

Reason No. 3 (Technical Support):

Executive Desk is designed to be powerful yet easy to use. Users of even the best software occasionally require technical help, however. Registration affords you access to our e-mail address and telephone technical support staff. Do not call for technical assistance if you have not registered Executive Desk.

Reason No. 4 (Free Updates, Big Upgrade Discounts):

Between version major releases, there are likely to be countless interim and maintenance releases of Executive Desk (5.xx). When you register, you will be able to use your activation code again and again to convert shareware versions to licensed versions for free. And, best of all, when the next major release is available you will receive big discounts of as much as 50% on upgrades.

Reason No. 5 (Legalities):

As is stated in the opening shareware license splash, if you use Executive Desk beyond the evaluation period, you must register it. In other words, if you use Executive Desk for more than 30 days without registering it, you are in violation of federal copyright law (and/or international treaties).
