

MACROS NOT ON THE KEYBOARD

Some macros in the FREE Keyboard library are not on the FREE Keyboard. They are in the library for various reasons.

Usefull macros not used by the FREE Keyboard

COUNT Counts the usage of a macro. See the macro for instructions on use.
[Utility]
BLOCKCPY | Simulates the Ctrl Insert and Ctrl Delete keys on
BLOCKMOV | enhanced keyboards
ID A nice little trailer macro if you don't need the bells and whistles of the big one.
INSTALL A large macro that installs the FREE Keyboard, either using the keyboards in the FREE macro library or moves these keyboards to a private macro location. It also copies the FREE Keyboard to diskette to take home.
MERGECU Merge cleanup. A non-generalized macro to get around the problem that a merge replace can not replace with nothing and similar limitations.
NOTE A macro to print on 5x8 note paper. Easily adapted to to other paper sizes.
SORTCU Finishes the sorting process. WP sorts on only the first 17 characters. This sorts on 60, however since it uses a bubble sort, use the WP sort first. Can also delete duplicate lines
SPACE Just a hard space for a keyboard.
SBR_ A collection of some of the subroutines used in the other macros. Collected here for budding macro writers.
TL Shows the codes of the character to the left. [Utility].
TR Shows the codes of the current character. [Utility]

Macros on the FREE Keyboard but not in the [Ctrl H] index.

HSPACE Replaces spaces with hard spaces for remainder of line.
Hard spaces are used by rolodex macros to control sorting. John Smith, Esq. sorts on E as the last word while John Smith,[]Esq. sorts on S. [Rolodex Utility]

Macros only used by other macros

FREDOCLO Pointer to the location of FREE Keyboard templates and other documents. Used only for unusual custom installations.
HSKEEP A macro to nest a custom macro to do routine tasks on a daily basis. I use it to reset default locations and display types changed by the communications server when working from home and to set [Alt n] variables.
LTRHEAD* Templates used for various letterheads
LTRSETUP Template macro to be customized to provide the letterhead macro (L_) with information about authors. Entered once here instead of daily.
MACROLOC Pointer to the FREE Keyboard macro library.
SIG-XXX Template signature file.
